Libra Shrugged David Gerard, 2020-11-02 Silicon Valley tries to disrupt the world and the world says no Facebook the biggest social network in history A stupendous world shaping success But governments were giving Facebook trouble over personal data abuses election rigging and fake news Mark Zuckerberg wondered what if Facebook could pivot to finance Or better what if Facebook started its own private world currency Facebook could have so much power that governments couldn't stop them It would be the Silicon Valley dream Facebook launched Libra in June 2019 Libra would be an international currency and payment system It would flow instantly around the world by phone It could even bank the unbanked Libra could apparently do all this just by using a blockchain But Libra would also make Facebook too big to control and to lead the way for Facebook's Silicon Valley fellows to swing the power of their money as they pleased Facebook and their friends could work around any single country's rules Libra could shake whole economies And Facebook would become the digital identity provider to the world If you wanted to use money at all you'd have to go through Facebook Governments looked at Libra and they saw another 2008 financial crisis in the making Facebook's plan would have made the company even more entrenched at the cost of broken economies worldwide Starting with toppling the US dollar Libra was as incompetent as it was arrogant and the world stopped it in its tracks But how did Facebook put forward such a bizarre and ill considered plan that left every regulator who saw it reeling in horror And what happens when another company tries the same trick Or when Facebook won't take no for an answer and releases the cut down version that they're already calling Libra 2.0
