Planchard, Marie P. Planchard, 2007 Additive Manufacturing -3D Printing & Design Dr. Sabrie Soloman, Additive Manufacturing 3D Printing rendering to the United States Census Bureau manufacturers are the nation s fourth largest employer and ship several trillions of dollars in goods per annum It may be a large automotive enterprise manufacturing vehicles or an institution with less than 50 employees Manufacturers are vital to the country s global success However many societies have misunderstandings about the manufacturing jobs are undesirable jobs and offers low paying compensations Other countries may be discouraged to compete against USA Additive Manufacturing Technology 3D Printing would level the manufacturing plane field enabling all countries to globally stand on equal footing Dr Sabrie Soloman Chairman CEO 3D Printing Design Not ever previously consumer has had a technology where we so easily interpret the concepts into a touchable object with little concern to the machinery or talents available 3D Printing Technology builds up parts by adding materials one layer at a time based on a computerized 3D solid model It allows design optimization and the producing of customized parts on demand Its advantages over conventional manufacturing have captivated the imagination of the public reflected in recent corporate implementations and in many academic publications that call additive manufacturing the Fourth Industrial Revolution 3D Printing produces 3D solid items from a digital computer file The printing occurs in an additive process where a solid object is generated through the consecutive layering of material The process begins with the generation of a 3D digital file such as CAD file The 3D digital file is then directed to a 3D Printer for printing using a simple print command Freed of the constraints of traditional factories additive manufacturing allows designers to produce parts that were previously considered far too complex to make economically Engineers and Biologists are finding practical applications to use 3D additive manufacturing It permits novel designs to become matchless rare products that were not likely with preceding manufacturing methods 3D Printing Technology is poised to transform medicine and biology with bio manufacturing and traditional manufacturing into 3D Printing This technology has the possibility to upsurge the well being of a nation s citizens Additive manufacturing may progress the worldwide resources and energy effectiveness in Ground Sea and Air This 3D Printing Design book will enable you to develop and 3D Print your own unique object using myriads of available worldwide materials One off prototypes can be hideously expensive to produce but a 3D Printer can bring down the cost by a sizable margin Many consumers goods mechanical parts aerospace automobiles robots shoes fashions architects models dentures hearing aids cell biology now appear in a 3D printed form for appraisal by engineers stylists biologist and clients before obtaining the final approval The 3D Printing Technology provides the additional

advantage of removing many overhead manufacturing costs and time delay The rewards are substantial as it permits product development teams effortlessly rapidly and cost effectively yielding models prototypes and patterns to be manufactured in hours or days rather than weeks or months

*3D Printing & Design* Dr. Sabrie Soloman, The book provides a detailed guide and optimum implementations to each of the stated 3D printing technology the basic understanding of its operation and the similarity as well as the dissimilarity functions of each printer School Students University undergraduates and post graduate student will find the book of immense value to equip them not only with the fundamental in design and implementation but also will encourage them to acquire a system and practice creating their own innovative samples Furthermore professionals and educators will be well prepared to use the knowledge and the expertise to practice and advance the technology for the ultimate good of their respective organizations
