Muzec Adem, 2020-10-30 Internet radio services are usually accessible from anywhere in the world with a suitable internet connection available one could for example listen to an Australian station from Europe and America This has made internet radio particularly suited to and popular among expatriate listeners Nevertheless some major networks like TuneIn Radio Entercom Pandora Radio iHeartRadio and Citadel Broadcasting except for news talk and sports stations in the United States and Chrysalis in the United Kingdom restrict listening to in country due to music licensing and advertising issues Internet radio is also suited to listeners with special interests allowing users to pick from a multitude of different stations and genres less commonly represented on traditional radio Internet radio also web radio net radio streaming radio e radio IP radio online radio is a digital audio service transmitted via the Internet Broadcasting on the Internet is usually referred to as webcasting since it is not transmitted broadly through wireless means It can either be used as a stand alone device running through the internet or as software running through a single computer Internet radio is generally used to communicate and easily spread messages through the form of talk It is distributed through a wireless communication network connected to a switch packet network the internet via a disclosed source Internet radio involves streaming media presenting listeners with a continuous stream of audio that typically cannot be paused or replayed much like traditional broadcast media in this respect it is distinct from on demand file serving Internet radio is also distinct from podcasting which involves downloading rather than streaming Internet radio services offer news sports talk and various genres of music every format that is available on traditional broadcast radio stations Many Internet radio services are associated with a corresponding traditional terrestrial

radio station or radio network although low start up and ongoing costs have allowed a substantial proliferation of independent Internet only radio stations The first Internet radio service was launched in 1993 As of 2017 the most popular internet radio platforms and applications in the world include but are not limited to TuneIn Radio iHeartRadio and Sirius XM
