The Varieties Of Reference Clarendon Paperbacks:

The Varieties of Reference Gareth Evans,1982 **The Unity of the Mind** D H M Brooks,1994-02-12 **Conceptual Flux** M. Perlman,2013-04-17 How can one think about a thing think something false about it and still be thinking about that thing at all If a concept is applied to something outside its meaning how are we to say it does not mean that thing as well The problem of misrepresentation is one of the central issues in contemporary philosophy of mind Here Mark Perlman criticizes the way all contemporary theories of mental representation seek to account for misrepresentation concluding that it cannot be explained naturistically Specifically Perlman evaluates and criticizes the theories of mental content proposed by Fodor Dretske Millikan Block Harman and others as well as examining verificationist approaches to meaning of Quine Davidson and Stich The book goes much further than criticism however Perlman formulates a naturalistic theory of representation that reluctantly accepts the unfortunate conclusion that there is no misrepresentation He adds a pragmatic theory of content which explains apparent misrepresentation as concept change Mental representations can be good or bad in specific contexts and for specific purposes but their correctness is not a matter of truth and falsity The pragmatic approach to mental content has implications for epistemology theories of truth metaphysics psychology and AI specifically connectionist networks Readership One of the most thorough examinations of mental representation and meaning holism available this book should be read by everyone interested in the mind and how ideas can have meaning It crosses boundaries from philosophy into psychology linguistics AI and cognitive science *The Science of Subjectivity* J. Neisser,2015-04-02 Can neuroscience help explain the first person perspective The Science of Subjectivity delves into the nature of experience arguing that unconscious subjectivity is a reality Neisser identifies the biological roots of the first person showing how ancient systems of animal navigation enable creatures like us to cope with our worldly concerns *Author and Journalist* ,1929 **The Author & Journalist** ,1924 **The Publishers Weekly** ,1917 **Among Our Books** Carnegie Library of Pittsburgh,1918 **Saturday Review** ,1889 *Understanding Perception* D. W. Hamlyn,1996 This book is an attempt to provide an account of the conception of perception by way of a discussion of the conditions which may have to be satisfied for that concept to have an application There is included therefore a discussion not only of perceptual experience but of the part played in perception by such things as conceptual understanding belief imagination attention and activity Although there is some reference to psychological work in the field of perception the main approach is philosophical in an analytical style Nevertheless the book tends to eschew large gestures in the philosophy of mind favouring an attention to detail in a way which some might describe as phenomenological The author has written much about perception in the past and the book might be characterized as summing up a lifetime of thinking about the subject Supplemental catalogue of books, by author, title, subject and class, added ... from October 1874 to December 1879-(1893).
