Your Mathematics Standards Companion, Grades 3-5 Linda M. Gojak, Ruth Harbin Miles, 2017-05-17 Transforming the standards into learning outcomes just got a lot easier. In this resource you can see in an instant how teaching to your state standards should look and sound in the classroom. Under the premise that math is math the authors provide a Cross Referencing Index for states implementing their own specific mathematics standards allowing you to see and understand which page number to turn to for standards based teaching ideas. It's all here page by page. The mathematics embedded in each standard for a deeper understanding of the content. Examples of what effective teaching and learning look like in the classroom. Connected standards within each domain so teachers can better appreciate how they relate. Priorities within clusters so teachers know where to focus their time. The three components of rigor: conceptual understanding, procedural skills and applications. Vocabulary and suggested materials for each grade level band with explicit connections to the standards. Common student misconceptions around key mathematical ideas with ways to address them. Sample lesson plans and lesson planning templates. Cross referenced index listing the standards in the following states explaining what is unique to the standards of each state. Your Mathematics Standards Companion is your one stop guide for teaching, planning, assessing, collaborating and designing powerful mathematics curriculum.

Priorities within clusters so teachers know where to focus their time. The three components of rigor: conceptual understanding, procedural skills and applications. Vocabulary and suggested materials for each grade level band with explicit connections to the standards. Common student misconceptions around key mathematical ideas with ways to address them. Don't spend another minute poring over the mathematics standards. Gojak and Miles have already done the heavy lifting for you. Focus instead on how to teach them using The Common Core Mathematics Companion as your one stop guide for teaching, planning, assessing, collaborating and designing powerful mathematics curriculum.

Measuring and Visualizing Space in Elementary Mathematics Learning Richard Lehrer, Leona Schauble, 2023-03-31 Measuring and Visualizing Space in Elementary Mathematics Learning explores the development of elementary students' understanding of the mathematics of measure and demonstrates how measurement can serve as an

anchor for supporting a deeper understanding of number operations and rational numbers The concept of measurement is centrally implicated in a number of mathematical operations yet is not often given the placement it deserves in the elementary mathematics curriculum By drawing on K 5 classroom research authors Lehrer and Schauble have been able to articulate a learning progression that describes benchmarks of student learning about measure in length angle area volume and rational number exploring related concepts classroom experiences and instructional practices at each stage Offering a unique research driven resource for helping students develop a deep understanding of measurement to further enhance mathematical understanding as well as further learning in other STEM disciplines the book will be relevant for scholars teacher educators and specialists in math education The book is accompanied by online resources developed for practitioners including instructional guides examples of student thinking and other teacher focused materials helping clarify how to bring concepts of measure and rational number to life in classrooms
