Articulated haulers A35E/A40E and A35E FS/A40E FS consist of two main sections, the tractor unit and the load unit. The two units are joined by means of the articulation joint, which allows movement about a vertical bearing for steering. The articulation joint also allows the units to rotate in relation to each other around the longitudinal axis.

The tractor unit consists of a six-cylinder diesel engine, transmission and dropbox as well as a drive shaft. The cab is suspended on rubber mountings in the frame. The frame is independently suspended in relation to the drive shaft. For a more detailed description of the FS machines, see [Full Suspension description](#).

The load unit consists of a frame, elevation load body, as well as a front and rear drive axle, which are linked by the bogie suspension.

The articulated hauler has constant, 4-wheel drive with the possibility of engaging and disengaging 6-wheel drive. It has a longitudinal differential lock in the dropbox and differential locks in the drive axles.
