### **Rethinking Techno-Politics in the**

**Digital Age: Global Technology Relations and Security** Arslan, Alp Cenk, Tinas, Murat, 2025-10-08 As digital technologies continue to grow in every facet of society rethinking techno politics in the digital age has become imperative to growth The intersection of technology and power is reshaping governance and raises the questions about control and accountability This evolving landscape calls for a reexamination of how policies are shaped who benefits from technological advancements and how democratic principles can be preserved in an increasingly data driven world Rethinking Techno Politics in the Digital Age Global Technology Relations and Security explores the rise of digital infrastructures the impact of new technologies on political and social culture and the strategic role of technology in global power dynamics This book fills a critical gap in the discourse surrounding technology s role in governance security and societal transformations Covering topics such as politics governance and technology this book is an excellent resource for academicians policymakers and technology professionals

**Value Co-Creation in Web 3.0** Robin Qiu, 2026-01-01 This book explores the architecture and framework for co creating the most valuable and promising data in the future Internet often referred to as Web 3 0 from the end user s perspective Unlike the current platform economy where user s daily usage and activity data is predominantly held by individual organizations Web 3 0 advocates for decentralized data management across interconnected platforms This approach aims to fully utilize the vast amounts of data generated by the increasingly connected physical world The book explains how Web 3 0 can be developed with fundamental and technological support to enhance decentralized data management and maximize benefits for end users Additionally it presents two use cases to illustrate how value co creation can be achieved using Web 3 0 The book is aimed primarily at students from business and engineering schools It also serves as a valuable teaching resource for instructors in management information systems MIS information systems information science and technology and data and computing sciences Additionally professionals interested in digital transformation blockchain technology data analytics AI and digital economy policymaking will find it highly relevant

### **Designing**

*Instruction with Generative AI* Brent A. Anders, 2025-09-16 Designing Instruction with Generative AI offers a novel set of tools and strategies for leveraging generative AI to create engaging and personalized learning experiences While instructional designers are a tremendous asset to higher education not all colleges or universities have the robust staff needed to support all instructors on staff or large student populations Drawing on a wealth of research professional experience and strategic insights this book equips new and seasoned teaching faculty and trainers with step by step directions on how freely accessible artificial intelligence software can assist with all aspects of the course creation and

instruction process and cater to the needs of diverse learners Each chapter offers forward thinking and empirically validated ways to help faculty create and improve instructional materials course design and learning environments while supporting their digital literacies Rather than introduce AI as a means of outsourcing subject area expertise critical thinking or cognitive processes the author instead emphasizes its potential to build on traditionally honed knowledge and foundational instructional design practices From optimizing course alignment and accessibility practices to fostering active learning motivation and engagement educators will find new solutions to common teaching and learning challenges with greater efficiency in time and capacity The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4 0 license

**Sustainable IT Playbook for Technology Leaders** Niklas Sundberg, Richard Pastore, 2026-01-16 At a time when digital technology intersects with non negotiable climate responsibility this updated edition presents modern strategies and tools technology leaders need to build and scale sustainable IT practices for long term impact Key Features Execute an actionable sustainable IT strategy using updated global frameworks and metrics Build your credibility as a sustainable IT advocate and stand out among senior IT leaders Access new case studies from peers on starting and accelerating IT sustainability journeys Download additional tools and resources from the book's website Book Description While the climate crisis poses a threat to planetary health digital transformation continues to reshape our societies The challenge for technology leaders is no longer understanding why sustainability matters but knowing how to take decisive responsible action This book gives you the clarity confidence and tools to drive meaningful change Updated with the latest trends case studies and insights including responsible and sustainable AI lifecycle governance it walks you through every stage of developing and implementing a sustainable IT strategy The book is structured in three parts Part 1 explores the why grounding you in the reality of the urgent climate crisis we face today how we arrived here the planetary boundaries we must restore and the broader impact of IT on society Part 2 covers the what outlining the practical actions you can take to drive meaningful returns on sustainable investments and build a greener future Part 3 focuses on the how establishing baselines setting direction and applying real world case studies to help you translate intent to impactful global outcomes Whether you're building a sustainability strategy from the ground up or enhancing existing initiatives this book prepares you to lead the way with confidence and deliver outcomes that matter What you will learn Recognize the environmental impact of IT systems and digital infrastructure Integrate sustainability into IT governance procurement and software delivery Apply the latest methods to optimize workloads reduce emissions and measure impact Establish a science based carbon emissions baseline for IT operations Build sustainability KPIs and dashboards that align with business reporting Inspire IT teams partners and C level stakeholders to embrace sustainability Navigate current regulations certifications and industry frameworks Who this book is for This book is for CIOs CTOs CDOs and senior IT leaders driving sustainable transformation within their organizations Also essential for

sustainability officers IT strategists cloud architects and consultants looking to embed sustainability into digital innovation

**North Brazil** Ernest Charles Buley,1921     **The Heart and the Chip** Daniela Rus,Gregory Mone,2024-03-05 Urges readers to consider how they might be used to enhance human work and to support human flourishing Valerie Thompson Science Daniela Rus a leading roboticist and computer scientist explores how we can use a new generation of smart machines to help humankind There is a robotics revolution underway A record 3 1 million robots are working in factories right now doing everything from assembling computers to packing goods and monitoring air quality and performance A far greater number of smart machines impact our lives in countless other ways improving the precision of surgeons cleaning our homes extending our reach to distant worlds and we're on the cusp of even more exciting opportunities In The Heart and the Chip roboticist Daniela Rus and science writer Gregory Mone provide an overview of the interconnected fields of robotics artificial intelligence and machine learning and reframe the way we think about intelligent machines while weighing the moral and ethical consequences of their role in society Robots aren't going to steal our jobs they're going to make us more capable productive and precise At once optimistic and realistic Rus and Mone envision a world in which these technologies augment and enhance our skills and talents both as individuals and as a species a world in which the proliferation of robots allows us all to be more human
