rejuvenation policies and actors embeddedness Those mechanisms enable the development of contextualised parameters that support projection attempts of future gentrification processes at the neighbourhood level As a result a reflective understanding of gentrification and policy recommendations are drawn at a general level The recommendations refer to the political understanding of gentrification and its role in urban development This analysis argues that cities should include gentrification as a driving force in urban policies However processes of gentrification require mediation and monitoring by public authorities who should be aware of the risk of social fragmentation As a consequence cities should move towards a social entrepreneurial city that moves beyond the simple distribution of financial resources and responsibilities and ensures social responsibility within the force field of ongoing neoliberal forces
