College Level the Playing Field? Sandy Baum, Michael McPherson, 2026-02-17 Why higher education is not a silver bullet for eradicating economic inequality and social injustice We often think that a college degree will open doors to opportunity regardless of one's background or upbringing In this eye opening book two of today's leading economists argue that higher education alone cannot overcome the lasting effects of inequality that continue to plague us and offer sensible solutions for building a more just and equitable society Sandy Baum and Michael McPherson document the starkly different educational and social environments in which children of different races and economic backgrounds grow up and explain why social equity requires sustained efforts to provide the broadest possible access to high quality early childhood and K 12 education They dismiss panaceas like eliminating college tuition and replacing the classroom experience with online education revealing why they fail to provide better education for those who need it most and discuss how wages in our dysfunctional labor market are sharply skewed toward the highly educated Baum and McPherson argue that greater investment in the postsecondary institutions that educate most low income and marginalized students will have a bigger impact than just getting more students from these backgrounds into the most prestigious colleges and universities While the need for reform extends far beyond our colleges and universities there is much that both academic and government leaders can do to mitigate the worst consequences of America's deeply seated inequalities This book shows how we can address the root causes of social injustice and level the playing field for students and families before during and after college InfoWorld, 1999-11-29 InfoWorld is targeted to Senior IT professionals Content is segmented into Channels and Topic Centers InfoWorld also celebrates people companies and projects Network World, 2001-05-21 For more than 20 years Network World has been the premier provider of information intelligence and insight for network and IT executives responsible for the digital nervous systems of large organizations Readers are responsible for designing implementing and managing the voice data and video systems their companies use to support everything from business critical applications to employee collaboration and electronic commerce **Marine Engineers Review**, 1998 Australian Journalism Review, 1997 Petroleum Review, 2004 **West Virginia Law Review**, 2010 **Scientific and Technical Review** Great Britain.
