## **The Constructivist Credo:**

**The Constructivist Credo** Yvonna S Lincoln, Egon G Guba, 2013-04-30 The Constructivist Credo is a set of foundational principles for those wishing to conduct social science research within the constructivist paradigm. They were distilled by Yvonna Lincoln and Egon Guba from their many writings on this topic and are provided in the form of 150 propositional statements. After Guba's death in 2008 the Credo was completed by Lincoln and is presented here. In addition to the key principles of constructivist thought the volume also contains an introduction to constructivism an intellectual biography and complete bibliography of Guba's work and a case study using constructivism showing how the paradigm can be applied to a research study. *Constructivism and the Metaphysics of Qualitative Research* John Paley, 2024-09-30 This book challenges the widespread assumption that a necessary preliminary to qualitative research is the formulation of ontological and epistemological beliefs. It argues that the metaphysical claims which supposedly underpin different approaches to social research do not make sense. Literally Sentences such as There is a single objective reality and There are multiple constructed realities fail to make information providing statements. They do not refer or describe. Despite appearances they say nothing about reality or realities at a fundamental level so they cannot be used to justify ground or align with methodological decisions. The necessary preliminary turns out not to be necessary at all and we can dispense with not just paradigms but metaphysical underpinnings in general whether structured as paradigms or not. Drawing on Wittgenstein's later philosophy, Carnap's metametaphysics and contemporary linguistics the book suggests that the metaphysical claims of qualitative texts can be reinterpreted as performative. Ontological and epistemological beliefs are resolutions and proposals recommendations for the use of language. They form part of a creed by means of which researchers enact the joining of an academic community. Written in Paley's trademark clear accessible and conversational style the book points to a revolution in our understanding of the relation between metaphysics and social research. It will be essential reading for anyone interested in qualitative research and its philosophical foundations.

**The Models of Engaged Learning and Teaching** John Willison, 2020-04-23 This book provides a practical philosophy for promoting students' sophisticated thinking from Early Childhood to PhD in ways that explicitly interconnect across the years of education. By covering the nature, philosophy, practice and implications of MELT for teachers and students alike the book will help teachers to facilitate students' awareness of and increasing responsibility for the thinking demanded by subject and discipline specific learning as well as interdisciplinary learning whether face to face, online or in blended modes. The book will also provide educators with ways to effectively engage with complex and sometimes conflicting contemporary educational concepts and with a diverse variety of colleagues involved in the learning and teaching enterprise.
