*Proceedings of the 2003 ACM SIGCOMM Internet Measurement Conference* ,2003 Internet Service Providers ISPs can exploit path diversity to balance load and improve robustness Unfortunately it is difficult to evaluate the potential impact of these approaches without routing and topological data which are confidential In this paper we characterize path diversity in the real Sprint network We then characterize path diversity in ISP topologies inferred using the Rocketfuel tool Comparing the real Sprint topology to the one inferred by Rocketfuel we find that the Rocketfuel topology has significantly higher apparent path diversity As a metric path diversity is particularly sensitive to the presence of false or missing links both of which are artifacts of active measurement techniques We evaluate heuristics that improve the accuracy of the inferred Rocketfuel topologies Finally we discuss limitations of active measurements techniques to capture topological properties such as path diversity **A Handbook of Information Technology** Bubu Bhuyan,2007 This handbook on information technology aims to bring together views of professors industry experts researchers and student learners from across all barriers to a common platform for the discussion and propagation of knowledge on the latest breakthroughs in the fields of information technology **Library & Information Science Abstracts** ,1998 **Microtimes** ,1998 **Conference Proceedings** ,2003 **Electrical & Electronics Abstracts** ,1997 *Forthcoming Books* Rose Arny,1997-12 **A Practical Guide to Fedora and Red Hat Enterprise Linux** Mark G.
