This volume contains 21 tutorial chapters organized according to the following themes: human-centered AI, human-centered machine learning, explainable AI, ethics, law, and the societal aspects of AI, argumentation, and social simulation. The contributions include learning objectives, reading lists, and links to further resources.

Institutional guide to using AI for research Xue Zhou, Hosam Al-Samarraie, 2025-07-21. This book provides a comprehensive exploration of the integration of artificial intelligence (AI) into academic research, specifically tailored for higher education institutions and postgraduate research (PGR) students. It addresses the unique challenges and opportunities that these institutions and students encounter when incorporating AI into research. The work emphasises practical case studies, step-by-step guides on AI tools and techniques, ethical considerations in AI usage, and features contributions from experts across various disciplines. Following the introduction, the book delves into the specifics of how AI can enhance academic research, such as literature review, data analysis, and interpretation, and assistance in academic writing across different disciplines. The wide range of topics introduced in this book is supported by practical examples and guidance. This book also explores the landscape of current AI applications in research, the methodologies for effectively leveraging AI technologies, and the critical ethical dimensions of AI work. The importance of interdisciplinary collaboration in expanding the use of AI in research is covered in this book by drawing on expert insights to provide a rich, multifaceted understanding of the potential of AI in academia. The combination of topics in this book can empower PGR students to navigate the complexities of AI in their research. The book is a much-needed compilation prepared by leading scholars in the field of digital technology to help PGRs as well as decision makers determine the best ways to integrate and use AI tools in research.
