[Revolutionizing Tropical Medicine](#) Kerry Atkinson,Prof. David

Mabey,2019-05-23 A comprehensive resource describing innovative technologies and digital health tools that can

revolutionize the delivery of health care in low to middle income countries particularly in remote rural impoverished

communities Revolutionizing Tropical Medicine offers an up to date guide for healthcare and other professionals working in

low resource countries where access to health care facilities for diagnosis and treatment is challenging Rather than

suggesting the expensive solution of building new bricks and mortar clinics and hospitals and increasing the number of

doctors and nurses in these deprived areas the authors propose a complete change of mindset They outline a number of ideas

for improving healthcare including rapid diagnostic testing for infectious and non infectious diseases at a point of care

facility together with low cost portable imaging devices In addition the authors recommend a change in the way in which

health care is delivered This approach requires task shifting within the healthcare provision system so that nurses laboratory

technicians pharmacists and others are trained in the newly available technologies thus enabling faster and more appropriate

triage for people requiring medical treatment This text Describes the current burden of communicable and non

communicable diseases in low to middle income countries throughout the world Describes the major advances in healthcare

outcomes in low to middle income countries derived from implementation of the United Nations World Health Organisation s

2000 Millennium Development Goals Provides a review of inexpensive rapid diagnostic point of care tests for infectious

diseases in low resource countries particularly for people living in remote rural areas Provides a review of other rapid point

of care services for assessing hematological function biochemical function renal function hepatic function and status

including hepatitis acid base balance sickle cell disease severe acute malnutrition and spirometry Explores the use of low

cost portable imaging devices for use in remote rural areas including a novel method of examining the optic fundus using a

smartphone and the extensive value of portable ultrasound scanning when x ray facilities are not available Describes the use

of telemedicine in the clinical management of both children and adults in remote rural settings Looks to the future of clinical management in remote impoverished rural settings using nucleic acid identification of pathogens the use of nanoparticles for water purification the use of drones the use of pulse oximetry and the use of near infrared spectroscopy Finally it assesses the potential for future healthcare improvement in impoverished areas and how the United Nations World Health Organization 2015 Sustainable Development Goals are approaching this Written for physicians infectious disease specialists pathologists radiologists nurses pharmacists and other health care workers as well as government healthcare managers Revolutionizing Tropical Medicine is a new up to date essential and realistic guide to treating and diagnosing patients in low resource tropical countries based on new technologies 30 2015 5 30 2015-05-01 3D IN 3D 2154 Tree of Voices 2D 3D 3D Business Model You 2D 3D 22K OUT of the box IN the new box 3D Connecting Connecting Connecting 3D 10 3D 5 350 3D OUT IN 4 3D 1 Maker 22K 2 Facebook LINE 3 App 1 1000 4 3D **Apple Watch For Dummies** Marc Saltzman,2019-11-14 Get connected with Apple Watch The new and improved Apple Watch does it all tells time tracks your fitness monitors your health keeps you connected and so much more Apple Watch for Dummies covers the latest series and version of Apple Watch giving you the lowdown on the new WatchOS You ll learn how to use all the exciting new features watch faces improvements to Siri and how to customize your Apple Watch to suit your needs From picking the right watch model and learning the newbie basics to must have apps troubleshooting and beyond this book will help you wrap your head around the Apple Watch Send and receive text message and e mails Use Siri to control Apple Watch with your voice Taking advantage of advanced health and fitness features Adjust Apple Watch settings to meet your needs Push Apple Watch to its limits with advanced techniques Whether you re a beginner or already an Apple Watch veteran read this book to get a handle on all the features and tools of the latest and greatest Apple Watch **I-Bytes Healthcare Industry**

Pavlik,2019-09-17 With the advent of the internet and handheld or wearable media systems that plunge the user into 360o video augmented or virtual reality technology is changing how stories are told and created In

this book John V Pavlik argues that a new form of mediated communication has emerged experiential news Experiential media delivers not just news stories but also news experiences in which the consumer engages news as a participant or virtual eyewitness in immersive multisensory and interactive narratives Pavlik describes and analyzes new tools and approaches that allow journalists to tell stories that go beyond text and image He delves into developing forms such as virtual reality haptic technologies interactive documentaries and drone media presenting the principles of how to design and frame a story using these techniques Pavlik warns that although experiential news can heighten user engagement and increase understanding it may also fuel the transformation of fake news into artificial realities and he discusses the standards of ethics and accuracy needed to build public trust in journalism in the age of virtual reality Journalism in the Age of Virtual Reality offers important lessons for practitioners seeking to produce quality experiential news and those interested in the ethical considerations that experiential media raise for journalism and the public
