Industrial Organization

Don E. Waldman, Elizabeth J. Jensen, Qi Ge, 2025-07-31 *Industrial Organization Theory and Practice* blends a rigorous theoretical introduction to industrial organization with empirical evidence, real world applications and case studies. It also supports students with a range of theoretical and applied problems and exercises. This balanced approach has earned the book its place as one of the leading undergraduate texts on industrial organization. The sixth edition has significantly expanded and updated theories, empirical findings, applications, industry landscapes, policies and cases throughout the book to reflect the latest developments in the field. Major updates include additional theoretical concepts with applications addressing current trends in business practices such as platform markets, algorithmic pricing, monopsony, killer acquisitions, subcontracting, subscription plans, influencer marketing and network effects, recent developments in public policy toward Big Tech and dominant platforms, labor market concentration, algorithmic collusion and net neutrality, greater emphasis on global perspective with a broader range of international examples, applications and cases, enhanced coverage of empirical approaches in industrial organization including an introduction to discrete choice models and difference-in-differences methods, a supplementary digital resource package offering additional learning and teaching materials. This comprehensive book bridges the gap between economic theory and real world case studies in an accessible, logical manner, making it the ideal undergraduate text for courses on industrial organization.

AI in Popular Culture Dal Yong Jin, 2025-12-08

This book examines the transformative impact of generative AI on cultural production with a particular focus on how AI technologies like ChatGPT are reshaping the creation of popular culture. Through a comprehensive analysis of both Global North and South perspectives, the book offers critical insights into AI governance, ethical considerations and the future of cultural production in an increasingly AI-integrated creative landscape. Tracing the evolution of AI in cultural industries from its early representations in films to its current active role in content creation across various media including film, television, music and animation, the book explores how AI has shifted from being merely depicted in cultural works to becoming an integral tool in the creative process, from pre-production to post-production stages. It critically analyzes three core concepts: creativity, control and credentials (3Cs) in the context of AI-driven cultural production, putting focus on the examination of precarious creativity, the tension between human creative expression and AI-generated content. The work addresses crucial concerns about labor rights, job security and creative control in the cultural industries. This book will interest graduate students and researchers in media studies, cultural studies, anthropology, globalization studies, sociology and science and technology studies (STS) as well as interested policymakers and practitioners interested in AI's impact on the creative industries.

Leadership 2.0 in processes of a sustainable change Prof. Dr. Michael Kurwan,2025-06-30 Document from the year 2025 in the subject Leadership and Human Resources Leadership language English abstract In order to successfully implement sustainable changes in a company in the context of change processes strong leadership is required at the top of a company which should have a great deal of empathy and a sure instinct in order to position the company in the market in the long term and profitably In order to successfully shape these sustainable changes it will not be the famous power of the leader of the past but will only work with the involvement of employees in the new world of work in the knowledge age which is characterized by digitalization and artificial intelligence This new form of leadership is also referred to as Leadership 2 0 in which it is important to retain top performers and in particular key personnel in the company in the long term which is a very challenging leadership task in HR management In change processes a fundamental distinction must be made between incremental change management and radical change management While incremental change takes place continuously and is integrated into everyday working life radical change represents a strategic realignment of the company which is largely associated with staff reductions and is intended to change the corporate culture This is particularly true in the case of restructuring where cost cutting programs play a decisive role in ensuring the long term survival of the company Employees are more willing to go along with incremental change also known as continuous improvement than radical change as they could also be affected by staff cuts This fuels employees fears and therefore often leads to high staff turnover
