*GPU Parallel Program Development Using CUDA* Tolga Soyata, 2018-01-19 GPU Parallel Program Development using CUDA teaches GPU programming by showing the differences among different families of GPUs This approach prepares the reader for the next generation and future generations of GPUs The book emphasizes concepts that will remain relevant for a long time rather than concepts that are platform specific At the same time the book also provides platform dependent explanations that are as valuable as generalized GPU concepts The book consists of three separate parts it starts by explaining parallelism using CPU multi threading in Part I A few simple programs are used to demonstrate the concept of dividing a large task into multiple parallel sub tasks and mapping them to CPU threads Multiple ways of parallelizing the same task are analyzed and their pros cons are studied in terms of both core and memory operation Part II of the book introduces GPU massive parallelism The same programs are parallelized on multiple Nvidia GPU platforms and the same performance analysis is repeated Because the core and memory structures of CPUs and GPUs are different the results differ in interesting ways The end goal is to make programmers aware of all the good ideas as well as the bad ideas so readers can apply the good ideas and avoid the bad ideas in their own programs Part III of the book provides pointer for readers who want to expand their horizons It provides a brief introduction to popular CUDA libraries such as cuBLAS cuFFT NPP and Thrust the OpenCL programming language an overview of GPU programming using other programming languages and API libraries such as Python OpenCV OpenGL and Apple s Swift and Metal and the deep learning library cuDNN

**Multimedia and Network Information Systems** Aleksander Zgrzywa, Kazimierz Choroś, Andrzej Siemiński, 2016-09-05 Recent years have seen remarkable progress on both advanced multimedia data processing and intelligent network information systems The objective of this book is to contribute to the development of multimedia processing and the intelligent information systems and to provide the researches with the essentials of current knowledge experience and know how Although many aspects of such systems have already been under investigation but there are many new that wait to be discovered and defined The book contains a selection of 36 papers

based on original research presented during the 10th International Conference on Multimedia Network Information Systems MISSI 2016 held on 14-16 September 2016 in Wrocław, Poland. The papers provide an overview of the achievements of researches from several countries in three continents. The volume is divided into five parts: a) Images and Videos, Virtual and Augmented Reality; b) Voice Interactions in Multimedia Systems; c) Tools and Applications; d) Natural Language in Information Systems; and e) Internet and Network Technologies. The book is an excellent resource for researchers, those working in multimedia, Internet and Natural Language technologies, as well as for students interested in computer science and other related fields.
