GPT-3 Sandra Kublik, Shubham Saboo, 2022-07-11 GPT-3 NLP with LLMs is a unique pragmatic take on Generative Pre-trained Transformer 3 the famous AI language model launched by OpenAI in 2020. This model is capable of tackling a wide array of tasks like conversation, text completion, and even coding with stunningly good performance. Since its launch, the API has powered a staggering number of applications that have now grown into full-fledged startups generating business value. This book will be a deep dive into what GPT-3 is, why it is important, what it can do, what has already been done with it, how to get access to it, and how one can build a GPT-3 powered product from scratch. This book is for anyone who wants to understand the scope and nature of GPT-3. The book will evaluate the GPT-3 API from multiple perspectives and discuss the various components of the new burgeoning economy enabled by GPT-3. This book will look at the influence of GPT-3 on important AI trends like creator economy, no-code, and Artificial General Intelligence and will equip the readers to structure their imaginative ideas and convert them from mere concepts to reality.

Advances in Social Simulation Marcin Czupryna, Bogumił Kamiński, Harko Verhagen, 2025-10-25 This book covers the latest advances in applying agent-based modelling in social sciences. The Social Simulation Conference is the major global conference devoted to this topic. It is aimed at promoting social simulation and computational social science. This year's special theme is Social Simulation Crossroads Between Social Science and Computational Methods, focused on modelling of social phenomena, computational aspects, and the theory linking these two scientific fields. The primary audience of this book are scholars and practitioners in computational social sciences including economics, business, sociology, politics, psychology, and urban studies.

Digital Business and Electronic Commerce Bernd W. Wirtz, 2024-06-04 This textbook introduces readers to digital business from a management standpoint. It provides an overview of the foundations of digital business with basics, activities, and success factors, and an analytical view on user behavior. Dedicated chapters on mobile and social media present fundamental aspects, discuss applications, and address key success factors. The Internet of Things (IoT) is subsequently introduced in the context of big data, cloud computing, and connecting technologies, with a focus on Industry 4.0 and the industrial metaverse. In addition, areas such as smart business services, smart homes, and digital consumer applications, as well as artificial intelligence, quantum computing, and automation based on artificial intelligence, will be analysed. The book then turns to digital business models in the B2C business-to-consumer and B2B business-to-business sectors. Building on the business model concepts, the book addresses digital business strategy, discussing the strategic digital business environment.

and digital business value activity systems dVASs as well as strategy development in the context of digital business Special chapters explore the implications of strategy for digital marketing and digital procurement Lastly the book discusses the fundamentals of digital business technologies and security and provides an outline of digital business implementation A comprehensive case study on Google Alphabet explaining Google s organizational history its integrated business model and its market environment rounds out the book
