Game of Loans Beth Akers,Matthew M.

Chingos,2018-05-29 Why fears about a looming student loan crisis are unfounded and how they obscure what s really wrong with student lending College tuition and student debt levels have been rising at an alarming pace for at least two decades These trends coupled with an economy weakened by a major recession have raised serious questions about whether we are headed for a major crisis with borrowers defaulting on their loans in unprecedented numbers and taxpayers being forced to foot the bill Game of Loans draws on new evidence to explain why such fears are misplaced and how the popular myth of a looming crisis has obscured the real problems facing student lending in America Bringing needed clarity to an issue that concerns all of us Beth Akers and Matthew Chingos cut through the sensationalism and misleading rhetoric to make the compelling case that college remains a good investment for most students They show how in fact typical borrowers face affordable debt burdens and argue that the truly serious cases of financial hardship portrayed in the media are less common than the popular narrative would have us believe But there are more troubling problems with student loans that don t receive the same attention They include high rates of avoidable defaults by students who take on loans but don t finish college the riskiest segment of borrowers and a dysfunctional market where competition among colleges drives tuition costs up instead of down Persuasive and compelling Game of Loans moves beyond the emotionally charged and politicized talk surrounding student debt and offers a set of sensible policy proposals that can solve the real problems in student lending

WHAT DO YOU KNOW ABOUT THE STUDENT DEBT CRISIS?

A June 12, 2020 report by the CNBC has made us to understand that 44 million Americans collectively hold over 1.6 trillion in student debt. And these numbers show no sign of declining. To worsen the situation technological advancements most especially automation are making it harder to earn a living wage without some type of advanced degree. Currently wages earned by graduate students are 80% higher than what is earned with just a high school diploma. Every year the United States Department of Education coughs out billions of dollars to help students get through college. This help comes through scholarships, grants, and loans. You can have a share of this cake and live your dreams. But on a second thought we have heard that in February this year the US officially entered a recession and over 42.6 million Americans filed for unemployment between mid March and June. During the 2008 recession many opted to go back to school and gain new skills. However since then the cost of a four year college degree increased by 25% and student debt increased by 107% and many are less sure if college will be the solution to riding out a recession this time around.

Going to college is a costly adventure. But that's not the issue. The issue is that it is getting more expensive than ever before. Only the brave can. Are you brave? If you are as strong as we think you are then maybe you can broaden your shoulders to bear the burden of going to college with a student loan. Hey take a chill pill will you? It is not as hard as you think. But how is the question. And that's where this guide comes in. [Student Loan Guide](#) will teach you Requirements that make you eligible for a student loan. The maximum and minimum amount you should borrow. Tip: To filling the financial aid form Best repayment options. How to deal with student loan crisis. Among others.
