Skill building techniques developed by expert authors who have prepared thousands of exam takers for success *The Brass World and Platers Guide* ,1927 **Field Evaluation of Unlighted Overhead Guide Signs Using Older Drivers**

Helmut T. Zwahlen,2003 Twenty older drivers aged 63 to 81 average 72 1 with corrected visual acuity ranging from 20 20 to 20 29 average 20 25 evaluated six sign material and lighting combinations under nighttime conditions on US Route 30 near Mansfield Ohio The tested material combinations all unlighted unless noted otherwise were legend on background beaded Type III on beaded Type III lighted beaded Type III on beaded Type III Type VIII on microprismatic Type III Type IX on beaded Type III Type IX on Type IX and Type VII on beaded Type III Evaluators sat in the passenger seat and middle center seat of a 2002 Dodge Caravan Headlights were kept on low beam The evaluation loop was driven twice once approaching signs in the left lane and once approaching in the right lane The evaluators completed questionnaires regarding sign visibility legibility and appearance after driving under each sign group and also an exit interview on the same topics at the end of the evaluation Based on questionnaire responses the highest rated sign groups in terms of legibility and visibility were Type IX on Type IX and Type VII on beaded Type III which in the exit interview were deemed acceptable for nighttime use by 80% and 65% of evaluators respectively In contrast the lighted beaded Type III on beaded Type III sign representing existing signing practice in Ohio was deemed acceptable by only 40 45% of evaluators The Type VIII on microprismatic Type III sign performed about as well as the lighted sign group receiving higher scores on the relevant questions on the Exit Interview 60% for legibility 55% for visibility but performing worse on the Sign Evaluation Forms The Type IX on beaded Type III a favored option in the previous study performed noticeably still worse and the unlighted beaded Type III on beaded Type III had the worst performance overall as was the case in the previous study Given that the Type IX on Type IX and Type VII on beaded Type III was clearly favored by evaluators over the lighted sign group it appears that switching from lighted signs to unlighted signs using Type VII on beaded Type III or Type IX on Type IX materials may represent an actual improvement for older drivers in addition to having benefits in terms of saving on electricity lighting maintenance costs and worker traffic hazards With the greater needs of older drivers the use at short distance of Type IX on Type IX signs instead of the previously suggested Type IX on beaded Type III is recommended *Spalding's Official Base Ball Guide for ...* ,1913 *Readers' Guide to Periodical Literature* Anna Lorraine Guthrie,1929 An author subject index to selected general interest periodicals of reference value in libraries **Country Guide and Nor'west Farmer** ,1927 *Your Official America Online Guide to Personal Computing* Keith Underdahl,2001-02
