The Problem of Natural Law Douglas Kries, 2008-01-01 The Problem of Natural Law examines the understanding of conscience offered by Thomas Aquinas who provided the classic statement of natural law The book suggests that natural law theory could be improved by bracketing Thomistic conscience and then shows how a natural law position thus revised would be able to answer the most important critics of natural law in contemporary times **Lancelot and Guenevere** Richard Hovey, 1900 Virgil's Aeneid Virgil, 1886 New-Church Messenger, 1929 **The Case for and Against Psychical Belief** Carl Murchison, Sir Oliver Lodge, 1927 Poet Lore, 1896 "Pearls of Thought" Samuel M. Fleischman, 1912

La Mettrie: Machine Man and Other Writings Julien Offray de La Mettrie, 1996-04-18 Julien Offray de La Mettrie 1709-51 author of Machine Man 1747 was the most uncompromising of the materialists of the eighteenth century and the provocative title of his work ensured it a succès de scandale in his own time It was however a serious if polemical attempt to provide an explanation of the workings of the human body and mind in purely material terms and to show that thought was the product of the workings of the brain alone This fully annotated edition presents an English translation of the text together with the most important of La Mettrie's other philosophical works translated into English and Ann Thomson's introduction examines his aims and the scandalous moral consequences which he drew from his materialism *Michigan Christian Advocate*, 1909 *Rhetoric and Reality in Plato's "Phaedrus"* David A. White, 1993-02-23 The Phaedrus is well known for the splendid mythical panorama Socrates develops in his second speech and for its graphic descriptions of erotic behavior This book shows how the details of the myth and the accounts of interaction between lovers are based on a carefully articulated metaphysical structure It follows the dialogue as narrated showing how passages that may not appear relevant to metaphysics have been deployed to heighten the vision of reality that Socrates develops in his second speech and concludes with an Epilogue in which the metaphysical principles adumbrated in the dialogue are ordered and briefly developed This Epilogue helps illustrate the continuity between the Phaedrus and subsequent dialogues such as the Parmenides Sophist Statesman and Philebus in which methodological and metaphysical concerns are dominant for Plato As a result new connections emerge between the metaphysical domain in Plato's thought and the more visible and vibrant areas of the psychology of eros and practical rhetoric *Launcelot and Guenevere* Richard Hovey, 1900 [The Works of John Dryden](#) John Dryden, 1889 **Trackless Regions** Gretchen Warren, 1917 **Taliesin** Richard Hovey, 1896 **The Poetical Works of John Dryden** John Dryden, 1909
