The Routledge Handbook of Media Use and Well-Being Leonard Reinecke, Mary Beth Oliver, 2016-06-23 The Routledge Handbook of Media Use and Well Being serves as the first international review of the current state of this fast developing area of research. The volume provides a multifaceted perspective on the beneficial as well as the detrimental effects of media exposure on psychological health and well being. As a first mover it will define the field of media use and well being and provide an essential resource for research and teaching in this area. The volume is structured along four central considerations. Processes presents concepts that provide a theoretical bridge between media use and well being such as psychological need satisfaction, recovery from stress and strain, self presentation and self enhancement, or parasocial interactions with media characters, providing a comprehensive understanding of the underlying processes that drive psychological health and well being through media. Moderators examines both risk factors that promote negative effects on well being and protective factors that foster positive media effects. Contexts bridges the gap between theory and real life by illustrating how media use can influence well being and satisfaction in very different life domains covering the full spectrum of everyday life by addressing the public, private, and work spheres. Audiences takes a look at the influence of life phases and

life situations on the interplay of media use and well being questioning whether various user groups differ with regard to the effects of media exposure Bringing together the expertise of outstanding international scholars from multiple disciplines including communication media psychology social psychology clinical psychology and media education this handbook sheds new light on the role of media in influencing and affecting emotions

Business India ,2010-04 **Proceedings of the Asia-Pacific Conference on Library & Information Education & Practice 2011 (A-LIEP 2011)** Fuziah Mohd. Nadzar,Mohd. Sharif Mohd. Saad,Szarina Abdullah,2011 **Actor Models and Digital Natives** Tobias Fritsch,2010-12-30 Master's Thesis from the year 2010 in the subject Sociology Media Art Music grade 1 0 University of Hagen language English abstract This thesis evaluates the role of actor models with regard to the

changes in virtual environments. The most commonly used actor models the homo economicus and the homo sociologicus as well as the emotional man and several less popular models are compared with regard to their level of explanation for behavior in virtual environment. In this context online communities i.e. gaming communities are observed. The research framework and the structural conception of the measurement also are explained in detail. A significant share of the input is based onto qualitative interviews with eight different digital natives who share a common computer gaming affinity. The analysis includes qualitative interviews with these e-athletes concerning their behavior within online communities. These interviews contain interesting findings about their motivation especially the difference between virtual and real world social relationships. The analysis shows interesting results since the players differentiate in between their role as an e-athlete versus their role as a person. This leads to a multi causal influence for their behavior which cannot solely be explained with a single influence factor. Neither the homo economicus nor the homo sociologicus thus can explain their behavior on its own. Therefore this thesis discusses methods to improve the current models in order to adopt behavioral changes through virtual environments. A trade off between the most commonly models is given. Afterwards the results of the analysis are compared to the statements of the interview partners. These interviews indicate a strong personal influence from the environment on the role of a private person. Additionally the behavior as an e-athlete is also influenced by logical decisions which can be modeled through the homo economicus.
