The Mathematics Teacher ,1953

Solving Principles of Accounting Problems Using Excel for Windows ,2005 This text helps students hit the road with a practical set of tools and the confidence they need to use those tools effectively in making business decisions The goal is to introduce a new Principles of Accounting text that better reflects a more conceptual and decision making approach to the material The authors have taken a new

macro to micro approach to the Principles of Accounting course by starting with a discussion of real financial statements first rather than starting with the Accounting Cycle although the Accounting Cycle is thoroughly covered in Chapters 3 and 4. The objective is to establish how a financial statement communicates the financing, investing and operating activities of a business to users of accounting information. They motivate students by grounding the discussion in the real world showing them the relevance of the topics covered to their future career.
