**The Composer's Black Box** Theodore Gordon,2025-12-02 Stories about new musical instruments are often told as quests for new kinds of sounds The Composer's Black Box asks What happens when new musical instruments produce not only new sounds but also new dynamics of musical agency and control And what consequences do those new dynamics have for musicality beyond sound With a focus on five key figures Morton Subotnick Pauline Oliveros Donald Buchla Alvin Lucier and Sun Ra this book explores how scientific and technological developments in mid twentieth century America galvanized musicians to reconfigure their conceptions of sociality freedom and the creative self Theodore Gordon shows how cybernetic thinking in a range of disciplines from experimental music to jazz and electrical engineering has shaped musical techniques and technologies and changed what it means to be a composer or more broadly a music making human in an increasingly informational world **Dissonant Voices** Joseph Pizza,2023-09-28 Dissonant Voices Race Jazz and Innovative Poetics in Midcentury America explores the braiding together of racial politics popular music and avant garde poetics in post war American culture Ranging from roughly the late 1940s to the early 1970s this study examines the development of open field poetics alternately termed projective verse after Charles Olson's influential essay of the same name In doing so it traces projective verse from its creation amidst the crucible of racial integration at Black Mountain College to its development through a series of interracial friendships explored among writers involved in the Boston San Francisco and downtown New York scenes to its reimagining by African American poets working in Harlem Los Angeles and beyond as part of the Black

Arts Movement Because the histories of integration jazz and postwar poetics have been studied too often as the subjects of disparate narratives and separate disciplines this arc of their shared development has also been largely obscured To remedy this the present study takes an interdisciplinary approach with insights from contemporary histories performance studies sound studies critical race theory and literary criticism informing the mix of literary analysis musicology and historical detail that comprises each chapter Accordingly the book argues for an integrated approach to the New American Poetry and the Black Arts Movement one that situates the midcentury poetics of breath and performance in the context of the Civil Rights era politics and jazz music that informed it Moreover it also unearths significant and little understood connections between Black Mountain the Beats the Boston Renaissance the New York scene and the Black Arts Movement expanding thereby our understandings of each and in a more general sense of contemporary American poetry politics and music in the process

**Epistrophies** Brent Hayes Edwards, 2017-06-05 Hearing across media is the source of innovation in a uniquely African American sphere of art making and performance Brent Hayes Edwards writes He explores this fertile interface through case studies in jazz literature both writings informed by music and the surprisingly large body of writing by jazz musicians themselves

*The Science Fiction of Poetics and the Avant-Garde Imagination* Michael Golston, 2023-11-19 How the tropes of science fiction infuse and inform avant garde poetics and many other kindred arts This insightful playful monograph from Golston does exactly what it advertises modeling poetics based on how poetry and some parallel artistic endeavors has filtered through a century plus of science fiction This is not a book about science fiction in and of itself but it is a book about the resonances of science fiction tropes and ideas in poetic language The germ of Golston's project is a throwaway line in Robert Smithson's *Entropy and the New Monuments* about how cinema supplanted nature as inspiration for many of his fellow artists The movies give a ritual pattern to the lives of many artists and this induces a kind of low budget mysticism which keeps them in a perpetual trance Golston charts how the demotic appeal of sci fi much like that of the B movie cross pollinated into poetry and other branches of the avant garde Golston creates what he calls a regular Rube Goldberg machine of a critical apparatus drawing on Walter Benjamin Roman Jakobson and Gilles Deleuze He starts by acknowledging that per the important work of Darko Suvin to situate science fiction critically the genre is premised on cognitive estrangement But he is not interested in the specific nuts and bolts of science fiction as it exists but rather how science fiction has created a model not only for other poets but also for musicians and landscape artists Golston's critical lens moves around quite a bit but he begins with familiar enough subjects Edgar Rice Burroughs Mina Loy William S Burroughs From there he moves into more alien terrain Ed Dorn's long poem *Gunslinger* the discombobulated work of Clark Coolidge Sun Ra Ornette Coleman and Jimi Hendrix all come under consideration The result of Golston's restless rich scholarship is the first substantial monograph on science fiction and avant garde poetics using Russian Formalism Frankfurt School dialectics and Deleuzian theory to show how the avant garde inherently follows the parameters of sci fi in both theme and form

**Geosonics** Joshua

Dittrich,2024-08-08 How do we listen to the earth That is the central question posed in Geosonics Listening Through Earth s Soundscapes Working across sound studies media theory and environmental media studies Joshua Dittrich explores the material and metaphorical geology of the sonic environment In an epoch of climate crisis environment is no longer a neutral background site or simple surrounding environment is immanently implicated in the chains of mediation that make up the material and imaginative infrastructure of our lives The analytical task of Geosonics is to tune into that infrastructure through sound Drawing on influential work in sound studies around the concept of transduction this book explores how listening does not take place in a pre existing soundscape but rather makes place by etching out a mediated mutually constitutive set of relations between listeners media and environments **Outsider Theory** Jonathan Eburne,2018-09-18

A vital and timely reminder that modern life owes as much to outlandish thinking as to dominant ideologies What do the Nag Hammadi library Dan Brown s The Da Vinci Code speculative feminist historiography Marcus Garvey s finances and maps drawn by asylum patients have in common Jonathan P Eburne explores this question as never before in Outsider Theory a timely book about outlandish ideas Eburne brings readers on an adventure in intellectual history that stresses the urgency of taking seriously especially in an era of fake news ideas that might otherwise be discarded or regarded as errant unfashionable or even unreasonable Examining the role of such thinking in contemporary intellectual history Eburne challenges the categorical demarcation of good ideas from flawed wild or bad ones addressing the surprising extent to which speculative inquiry extends beyond the work of professional intellectuals to include that of nonprofessionals as well whether amateurs unfashionable observers or the clinically insane Considering the work of a variety of such figures from popular occult writers and gnostics to so called outsider artists and pseudoscientists Eburne argues that an understanding of its circulation and recirculation is indispensable to the history of ideas He devotes close attention to ideas and texts usually omitted from or marginalized within orthodox histories of literary modernism critical theory and continental philosophy yet which have long garnered the critical attention of specialists in religion science studies critical race theory and the history of the occult In doing so he not only sheds new light on a fascinating body of creative thought but also proposes new approaches for situating contemporary humanities scholarship within the history of ideas However important it might be to protect ourselves from bad ideas Outsider Theory shows how crucial it is for us to know how and why such ideas have left their impression on modern day thinking and continue to shape its evolution **The Immeasurable Equation** Sun

Ra,Hartmut Geerken,2006 **Signal to Noise** ,2006 **The Funk Era and Beyond** Tony Bolden,2008-07-15 The Funk Era and Beyond is the first scholarly collection to discuss funk music in America and delve into the intricate and complex nature of the word and its accompanying genre While pleasure and performance are often presumed to be mutually exclusive of intellectuality funk offers immense possibilities for a new critical rubric As these writings demonstrate funk is reflected in myriad forms and context and has been the catalyst for stylistic innovation Contributors employ a multitude of methodologies

to examine this unique musical field's relationship to African American culture and to music literature and visual art as a whole    **Coda Magazine** ,2005    Jazz Times ,2006    *Space Travel and Culture* Martin Parker,David Bell,2009-06-08  
Explores the significance of the first Apollo moon landing and how the countless books films and products associated with factual space fiction had an affect on popular culture and artistic practice but not social sciences and humanities Investigates how a topic is hugely important in popular culture but almost invisible in the academy and how it makes us want to ask questions about visibility or perhaps self censorship Evaluates how little impact the space age actually had on the social sciences and humanities partly because its combination of military industrial cold war politics combined with patriarchy and big science sits uneasily with contemporary thought in these areas Provides an interdisciplinary collection of essays on various aspects of NASA the moon landing and the commercialization of space generally The book travels from hard engineering to space romance echoing the variety of attempts to blur science and culture    **The Wire** ,2005    Imaginal Machines Stephen Shukaitis,2009 Drawing from autonomist politics class composition analysis and avant garde arts Imaginal Machines explores the emergence functioning and constant breakdown of the embodied forms of radical imagination    Performing Utopia and the Apocalyptic Desire André-Jacques Pinochet Elias,2006    *Gesammelte Schriften* Salomo Friedlaender,2005    *Grotesken* Salomo Friedlaender,2008
