## **Critical Infrastructure Protection XIII**

Jason Staggs, Sujet Shenoi, 2019-11-18 The information infrastructure comprising computers, embedded devices, networks and software systems is vital to operations in every sector: chemicals, commercial facilities, communications, critical manufacturing, dams, defense, industrial base, emergency services, energy, financial services, food and agriculture, government facilities, healthcare and public health, information technology, nuclear reactors, materials and waste, transportation systems, and water and wastewater systems. Global business and industry, governments, indeed society itself, cannot function if major components of the critical information infrastructure are degraded, disabled, or destroyed. Critical Infrastructure Protection XIII describes original research results and innovative applications in the interdisciplinary field of critical infrastructure protection. Also, it highlights the importance of weaving science, technology, and policy in crafting sophisticated yet practical solutions that will help secure information, computer, and network assets in the various critical infrastructure sectors. Areas of coverage include: Themes and Issues, Infrastructure Protection, Vehicle Infrastructure Security, Telecommunications Infrastructure Security, Cyber Physical Systems Security, and Industrial Control Systems Security. This book is the thirteenth volume in the annual series produced by the International Federation for Information Processing (IFIP) Working Group 11.10 on Critical Infrastructure Protection, an international community of scientists, engineers, practitioners, and policy makers dedicated to advancing research, development, and implementation efforts focused on infrastructure protection. The book contains a selection of sixteen edited papers from the Thirteenth Annual IFIP WG 11.10 International Conference on Critical Infrastructure Protection held at SRI International, Arlington, Virginia, USA, in the spring of 2019.

Critical Infrastructure Protection XIII is an important resource for researchers, faculty members, and graduate students, as well as for policy makers, practitioners, and other individuals with interests in homeland security.
