Successful Online Learning: Managing the Online Learning Environment Efficiently and Effectively Theresa A. Middleton Brosche, 2009-12-23 *Academic Success in Online Programs* Jacqueline S. Stephen, 2024-04-02 This book provides higher education students with a comprehensive resource to assist them in their academic persistence in an online course or program. It addresses a wide selection of topics emphasizing a myriad of factors that impact a student's persistence and ultimate success in an online program or course. The book helps students to gain insight into the skills, knowledge, and attributes needed to succeed in the autonomous nature of an online learning environment. Thus, this book helps students to proactively engage in activities to prepare for online learning. Information presented in each chapter is drawn from theory and recent research centered on persistence of online students in higher education. It incorporates hands-on practical activities to promote application of theory and research and encourages students to demonstrate their knowledge, skills, and abilities through the use of reflective and thought-provoking activities. Hence, this book provides online students with an up-to-date resource they can use to develop an awareness of their readiness and preparedness for online learning. Additionally, this book equips students with information and strategies aimed at helping them to address gaps in their skills and knowledge that may present them with barriers to academic success. The content of this book is aligned with widely used student learning outcomes and objectives of first year student seminar courses and orientation programs for graduate and undergraduate students enrolled in online programs. Furthermore, it is deliberately organized and structured to support an online student's academic journey as they navigate the online learning environment. As such, these features make it an ideal book for use by students, instructors, and academic advisors or college and university academic support staff.

Online Course Success for High School Students

Abbie C. Cook,2006 Online learning is virtually springing up everywhere this form of Internet based learning has become very popular in K 12 public schools over the last decade The growth in the last few years has been phenomenal However with this extraordinary growth come growing pains Student success factors related to online courses are complex as high achieving students may not always do well and at risk students may be more successful This research attempts to identify if an association exists between high school student reading ability and online course success and completed course grades Online course success consists of the completion of the course with a passing grade Each student enrolled in this specific Midwestern virtual school completed the Stanford Diagnostic Reading Test SDRT4 This study addressed the following questions 1 What is the relationship between student reading ability and online course success measured by course completion stop out or dropout 2 What is the relationship between student reading ability and online course grades A B C D F 3 What is the relationship between student reading ability and specific content

area math science social studies English course success measured by course completion stop out or dropout 4 What is the relationship between student reading ability and specific content area math science social studies English course completion grades A B C D F Results demonstrated a low positive correlation among the variables of online course success data and the participant reading ability except for math course completion status and science course completion grades Although the correlation was significant for almost all the combinations of the variables the low r^2 statistics indicate that very low percentages of the variability in course success and course grades could be explained by reading ability Therefore replication of this study s goals are recommended as well further expanding the research for virtual high school course success by looking into other measures that may influence student success and course grades or supercede reading ability and enable student success *Online Education and Adult Learning: New Frontiers for Teaching Practices* Kidd, Terry T.,2009-08-31

This book disseminates current issues and trends emerging in the field of adult e learning and online instruction Provided by publisher **Predictors of Success for High School Students Enrolled in Online Courses in a Single District**

Program David T. Rankin,2013 The rapid growth in online learning opportunities and online courses in K 12 education is well documented in the literature Studies conducted by various researchers that have focused on the K 12 population of online learners demonstrate that certain online learner characteristics and online learning environment characteristics may impact the likelihood of students passing or failing online courses Research has produced models that predict online course success with measurable degrees of accuracy This descriptive study examines characteristics of students enrolled in online high school courses provided by a virtual learning program administered by a single Virginia public school district The study determined that students prior academic success confidence in their technology skills and access to technology confidence in their ability to achieve and strong beliefs in their organizational skills proved to have a significant statistical relationship with online course success The study developed a model with these factors that predicted success in online courses with a high degree of accuracy and predicted failure with a moderate degree of accuracy The study has policy implications for public school leaders in Virginia as they implement recent state legislation requiring students to successfully complete a virtual course to graduate from public high school The study indicates that additional research is warranted to further delineate learner and learning environment characteristics producing a model that more accurately predicts failure in online courses Additional research is warranted with larger samples from single district virtual programs *Building Online Learning*
