**Suffering, Suicide and Immortality** Arthur Schopenhauer, 2014-03-05 One of the greatest philosophers of the nineteenth century Arthur Schopenhauer is best known for his writings on pessimism In this 1851 essay collection he offers concise statements of the unifying principles of his thinking Schopenhauer unlike most philosophers expressed himself in simple direct terms These essays offer an accessible approach to his main thesis as stated in The World as Will and Representation Schopenhauer's reasoning encompasses the influence of the Upanishads and Buddhist teachings as well as the works of Plato and Kant His philosophy had an enormous impact on contemporary philosophy and literature and on subsequent thinkers such as Nietzsche Freud and Wittgenstein Published toward the end of his life in a collection called *Parerga und Paralipomena* these essays include On the Sufferings of the World On the Vanity of Existence On Suicide Immortality A Dialogue Further Psychological Observations On Education On Women and On Noise plus A Few Parables They remain among Schopenhauer's most popular works offering insights into his philosophy as a whole as well as the human condition

**Existentialism and the Desirability of Immortality** Adam Buben, 2022-06-30 This book looks to existential thinkers for reasons to hope immortal life could be worth living It injects new arguments and insights into the debate about the desirability of immortality and tackles related issues such as boredom personal identity technological progress and the meaning of life Immortality in some form or another is a common topic throughout the history of philosophy but many thinkers who consider its possibility or necessity give little attention to the question of whether it would be worthwhile Recent work on the topic has been dominated by transhumanists in pursuit of radical life extension and philosophers from the analytic tradition who argue about the dangers of immortality This book makes the case that continental thinkers including Søren Kierkegaard Friedrich Nietzsche Miguel de Unamuno Martin Heidegger Jean Paul Sartre Albert Camus and Simone de Beauvoir have much to offer the debate on immortality For most of these figures it seems possible that an unending life would not preclude the preservation of personal identity or the sorts of dangers and deadlines required to maintain something like ordinary human values and fend off boredom The author draws connections between these so called existentialists and demonstrates how they contribute to an overarching argument about the desirability of immortality

**Existentialism and the Desirability of Immortality** will be of interest to researchers and advanced students working on the philosophy of death and the history of existentialism

**Embodying Differences** Henrietta Mondry, 2021-03-02 This book analyzes the ways in which literary works and cultural discourses employ the construct of the Jew's body in relation to the material world in order either to establish and reinforce or to subvert and challenge dominant cultural norms and stereotypes It examines the use of physical characteristics embodied practices tacit knowledge and senses to define the body taxonomically as normative different abject or mimetically desired Starting from the works of Gogol and Dostoevsky through to contemporary Russian Jewish women's writing broadening the scope to examining the role of objects museum displays and

the politics of heritage food the book argues that materiality can embody fictional constructions that should be approached on a culture specific basis *Remembering The End* P. Travis Kroeker, 2018-03-08 Dostoevsky was one of those writers of the nineteenth century who came to be regarded by many readers in the following century as a prophet How does he remain prophetic for us now in the early twenty first century Remembering the End explores and assesses Dostoevsky's critique of modernity with particular focus on the Grand Inquisitor in The Brothers Karamazov where his prophetic vision finds its most intense expression The authors write to elucidate the spiritual realism of Dostoevsky's biblically charged literary art and to show how it can help us to remember who we are in this modern postmodern moment in which as individuals and members of communities we are required to make critical choices about the meaning of justice history truth and happiness The book will be of interest to readers in comparative literature ethics political theory philosophy religious studies and theology

**Forgiveness: Promise, Possibility, & Failure**, 2020-05-18 This interdisciplinary collection explores the wealth of nuances surrounding the concept and practice of forgiving The essays within this work ask what it means to forgive what constitutes an appropriate space to forgive what is to be expected of the victim and wrongdoer what actions must be connected to political forms of forgiveness

**Quotations from Socrates to Macaulay** Samuel Austin Allibone, 1880 **Prose** **Quotations from Socrates to Macaulay** Samuel Austin Allibone, 2024-06-13 Reprint of the original first published in 1876 [Suicide in French Thought from Montesquieu to Cioran](#) Zilla Gabrielle Cahn, 1998 Suicide stems in large part from the human condition and as such is not a problem that can be solved Former draconian and punitive laws against it have in the main been eliminated but it remains a stigma and a heartache In the twentieth century suicide has become a problem for sociologists psychiatrists and social policymakers to solve In past centuries however suicide was a subject most fit for philosophers theologians writers and as the nineteenth century progressed physicians What establishes itself clearly throughout is that social attitudes and public policies toward suicide as toward other important human issues mirror the needs and peculiar circumstances of a culture Yet sanctions against suicide except in highly prescribed instances transcend cultural specificity To the question when if ever is suicide permissible Western peoples and institutions both secular and religious reply never Duty to others to God to society or to all of these virtually always overrides personal desire or reasons to commit suicide *Should You Die?* Augusto T. S. Cruz, Living healthily for centuries is no longer a sci fi prospect It is very likely that the first person to live to 200 years in good health is already alive scientific and technological advances of today are starting to produce medicines and treatments which tackle aging directly The true debate is no longer about whether we can extend our lives and fight death it is about whether we should If advances in medicine and engineering protect you and others from aging diseases injuries and accidents allowing you to live as a healthy 25 year old for as long as you wanted where death could only visit you if and when you wished should you say yes to this future And what happens if enough people say yes Will overpopulation be inevitable

Will we lose our identity as humans by relinquishing mortality Will humanity be challenging the natural and divine order Will we grow lazy and complacent Will the divide between the rich and poor grow Or is overcoming aging and disease a mandate of medicine and a moral imperative to aim for Perhaps even our destiny as humans In the same way push back on hunger pestilence and violence should we end the cycle of suffering and death which aging brings to us all In Should You Die Augusto T S Cruz weighs in on these questions The author methodically picks apart arguments supporting each side of the debate highlighting their strengths and weaknesses making the book an excellent primer for those interested in the discussion and a helpful guide for those already involved

**The Everlasting Evangel and Its Program** Henry Harrison

Peters,1927 **Prose Quotations from Socrates to Macaulay, with Indexes** Samuel Austin Allibone,1876 *The Works of Schopenhauer, Abridged* Arthur Schopenhauer,1928 The translations of the Essays are by T Bailey Saunders the selections from The world as will and idea are taken from the translation by R B Haldane and J Kemp **The Wonders of Life** Ernst Haeckel,1904 The publication of the present work on The Wonders of Life has been occasioned by the success of The Riddle of the Universe which was written five years prior to this volume Within a few months of the issue of this study of the monistic philosophy in the autumn of 1899 ten thousand copies were sold The clear opposition of the author s monistic philosophy based as it was on the most advanced and sound scientific knowledge to the conventional ideas and to an outworn revelation led to the publication of a vast number of criticisms and attacks The present work on the wonders of life is as the title indicates a supplementary volume to The Riddle of the Universe While the latter undertook to make a comprehensive survey of the general questions of science as cosmological problems in the light of the monistic philosophy the present volume is confined to the realm of organic science or the science of life It seeks to deal connectedly with the general problems of biology in strict accord with the monistic and mechanical principles which had been laid down by the author in 1866 in his work titled General Morphology In the latter publication special stress was placed on the universality of the law of substance and the substantial unity of nature which had been further treated in the second and fourteenth chapters of The Riddle of the Universe The arrangement of the vast material for this study of the wonders of life was modeled on that of the Riddle Retained in the present volume is the division into larger and smaller sections and the synopses of the various chapters Thus the whole biological content falls into four sections and twenty chapters Preface PsycINFO Database Record c 2010 APA all rights reserved
