Fossil Energy Update ,1986 **Creating Intelligent Content with Lightweight DITA** Carlos Evia,2018-12-07

Creating Intelligent Content with Lightweight DITA documents the evolution of the Darwin Information Typing Architecture DITA a widely used open standard for structuring technical content DITA has grown in popularity and features since its origins as an internal grammar for structuring technical documentation at IBM This book introduces Lightweight DITA LwDITA which should be read as Lightweight DITA as a proposed version of the DITA standard that reduces its dependence on complex Extensible Markup Language XML structures and simplifies its authoring experience This volume aims to reconcile discrepancies and similarities in methods for authoring content in industry and academia and does so by reporting

on DITA's evolution through the lens of computational thinking which has been connected in scholarship and media to initiatives for learning to code and programming. Evia's core argument is that if technical communicators are trained with principles of rhetorical problem solving and computational thinking they can create structured content in lightweight workflows with XML, HTML5 and Markdown designed to reduce the learning curve associated with DITA and similar authoring methodologies. At the same time this book has the goal of making concepts of structured authoring and intelligent content easier to learn and teach in humanities based writing and communication programs. This book is intended for practitioners and students interested in structured authoring or the DITA standard.

Describing Prescriptivism Ingrid Tieken-Boon van Ostade, 2019-10-08. Describing Prescriptivism provides a topical and thought provoking analysis of linguistic prescriptivism in British and American English from a historical as well as present day perspective. Focusing on usage guides and usage problems the book takes a three fold approach to present an in depth analysis of the topic featuring a detailed study of the advice provided in usage guides over the years, an authoritative comparison of this advice with actual usage as recorded in British and American corpora including the HUGE Hyper Usage Guide of English database developed specifically to enable this line of study as well as more mainstream corpora such as COCA, COHA and the BNC, a close analysis of the attitudes to particular usage problems among the general public based on surveys distributed online through the Bridging the Unbridgeable research project's blog. With extensive case studies to illustrate and support claims throughout this comprehensive study is key reading for students and researchers of prescriptivism, the history of English and sociolinguistics.
