Assessing Language and Literacy with Bilingual Students Lori Helman, Anne C. Ittner, Kristen L.

McMaster, 2019-08-27 From expert authors this book guides educators to conduct assessments that inform daily instruction and identify the assets that emergent bilinguals bring to the classroom Effective practices are reviewed for screening assessment and progress monitoring in the areas of oral language beginning reading skills vocabulary and comprehension in the content areas and writing The book also addresses how to establish schoolwide systems of support that incorporate family and community engagement Packed with practical ideas and vignettes the book focuses on grades K 6 but also will be useful to middle and high school teachers Appendices include reproducible forms that can be downloaded and printed in a convenient 8 1/2 x 11 size

Handbook of Orthography and Literacy R. Malatesha Joshi, P.G. Aaron, 2013-05-13 Until about two decades ago the study of writing systems and their relationship to literacy acquisition was sparse and generally modeled after studies of English language learners This situation is now changing As the worldwide demand for literacy continues to grow researchers from different countries with different language backgrounds have begun examining the connection between their writing systems and literacy acquisition This text which derives from a NATO sponsored conference on orthography and literacy brings together the research of 70 scholars from across the world the largest assemblage of such experts to date Their findings are grouped into three parts as follows Part I Literacy Acquisition in Different Writing Systems describes the relationship between orthography and literacy in twenty five orthographic systems This section serves as a handy reference source for understanding the orthographies of languages as diverse as Arabic Chinese English Icelandic Kannada and Kishwahili Part II Literacy Acquisition From a Cross Linguistic Perspective makes direct comparisons of literacy acquisition in English and other orthographic systems The overall conclusion that emerges from these eight chapters is that the depth of an orthographic system does influence literacy acquisition primarily by slowing down the acquisition of reading skills Even so studies show that dyslexic readers can be found across all orthographic systems whether shallow or deep which shows that dyslexia also has internal cognitive and biological components Part III Literacy Acquisition Instructional Perspectives explores literacy acquisition from developmental and instructional perspectives and ends with a look into the future of literacy research This Handbook is appropriate for scholars researchers and graduate students in such diverse fields as cognitive psychology psycholinguistics literacy education English as a second language and communication disorders

The Impact of Multisensory Foreign Language Instruction on Self-efficacy in Students with Developmental Dyslexia Bogusława Gosiewska-Turek, 2025-07-02 This book investigates the effect of multisensory instruction on self efficacy among students with developmental dyslexia learning English as a foreign language The first three chapters of the book delve into theoretical aspects of developmental dyslexia multisensory instruction and self efficacy providing an overview of existing research in this domain The second part of the book reports empirical findings obtained from a case study supplemented by quantitative analysis These findings highlight the advantages of employing multisensory instructional techniques for teaching foreign languages to students with dyslexia Notably the application of multisensory instruction not only enhances dyslexic students foreign language competencies but also positively impacts their self efficacy The study underscores the importance of language instruction tailored to the special educational needs of students with dyslexia as well as its potential to foster self efficacy an essential factor for success in foreign language learning

Learning to Read and Write Margaret Harris, Giyoo Hatano, 1999-05-27 For many years the development of theories about the way children learn to read and write was dominated by studies of English speaking populations As we have learned more about the way that children learn to read and write other scripts whether they have less regularity in their grapheme phoneme correspondences or do not make use of alphabetic symbols at all it has become clear that many of the difficulties that confront children learning to read and write English specifically are less evident or even non existent in other populations At the same time some aspects of learning to read and write are very similar across scripts The unique cross linguistic perspective offered in this book including chapters on Japanese Greek and the Scandinavian languages as well as English shows how the processes of learning to read and spell are affected by the characteristics of the writing system that children are learning to master
