What Are Universities For:

What are Universities For? Stefan Collini, 2012-02-23 Across the world universities are more numerous than they have ever been yet at the same time there is unprecedented confusion about their purpose and scepticism about their value. *What Are Universities For* offers a spirited and compelling argument for completely rethinking the way we see our universities and why we need them. Stefan Collini challenges the common claim that universities need to show that they help to make money in order to justify getting more money. Instead he argues that we must reflect on the different types of institution and the distinctive roles they play. In particular we must recognize that attempting to extend human understanding which is at the heart of disciplined intellectual enquiry can never be wholly harnessed to immediate social purposes particularly in the case of the humanities which both attract and puzzle many people and are therefore the most difficult subjects to justify. At a time when the future of higher education lies in the balance *What Are Universities For* offers all of us a better deeper and more enlightened understanding of why universities matter to everyone.

Speaking of Universities Stefan Collini, 2017-02-07 In recent decades there has been an immense global surge in the numbers both of universities and of students. In the UK alone there are now over 140 institutions teaching more subjects than ever to nearly 2.5 million students. New technology offers new ways of learning and teaching. Globalisation forces institutions to consider a new economic horizon. At the same time governments have systematically imposed new procedures regulating funding, governance and assessment. Universities are being forced to behave more like business enterprises in a commercial marketplace than centres of learning. In *Speaking of Universities* historian and critic Stefan Collini analyses these changes and challenges the assumptions of policy makers and commentators. Does marketisation threaten to destroy what we most value about education? Does this new era of accountability distort what it purports to measure and who does the modern university belong to? Responding to recent policies and their underlying ideology the book is a call to focus on what is actually happening and the clichés behind which it hides an incitement to think again, think more clearly and then to press for something better.

This book looks at the role of the university in a social and economic context as a repository of knowledge and a site for instruction. It considers how universities are founded, funded, governed, lead and managed. How the advent of increased fees has affected their relationship with students and what is in the future for higher education.
