

# **Using Tables, Charts, and Graphs**

## **Overview**

Students practice some basic graphing skills, using data they collected and data from a table.

## **Related Standards of Learning 3.1g**

### **Objectives**

The students should be able to:

- communicate results of investigations by displaying data in the form of tables, charts, and graphs;
- construct bar graphs, picture graphs, and line plots to display data.

### **Materials needed**

- Aquarium filled with water
- A dime, a penny, a nickel, and a quarter
- Several stopwatches or a clock with visible second hand

Per student:

- Science journal
- Pencil
- "Bar and Picture Graph Scoring Sheet" handout (see p. 3)
- "Line Plot Scoring Sheet" handout (see p. 4)

### **Instructional activity**

#### **Content/Teacher Notes**

Third-grade students should use graphs frequently in math and science classes. Many of the scientific investigations that students conduct throughout the year are good opportunities to incorporate graphing into the class activity.

#### **Introduction**

1. Ask students to predict which coin would fall faster through an aquarium filled with water: a dime, a penny, a nickel, or a quarter. Ask them how they might test their hypothesis, and take their responses. Then ask them how data for such an experiment might be recorded. Lead students to realize that data tables and graphs can be used to record and display such data.

#### **Procedure**

1. Before beginning the activity, have students construct a table in their journal similar to the one shown at right to record the data they will be collecting.
2. Designate one student to be the dropper of the coins for the class, and designate several students to be timers. These students should time how long it takes the coin to fall from just above the surface of the water to the bottom of the tank. Time should begin the moment the coin leaves the dropper's hand. The dropper should execute the same procedure for each drop to keep the experiment fair.
3. Have students conduct at least four trials for each coin and record the data in their table.
