

This service manual contains detailed descriptions of all removal, repair and servicing procedures for models FSC 410, FSC 500, FSC 550, FSC 415 and KOM 50, which are based on the series 41140 powerheads.

If there is no specific reference to individual machines, the procedure is the same for all machines. The illustrations may differ depending on the machines, but the methods used and the sequence of operations are identical.

You will find detailed descriptions of procedures for removing and repairing engine components and disassembled (CombiTools in the service manual) for the "Series 41140 Powerheads".

You should make use of the illustrated parts lists while carrying out repair work. They show the installed positions of the individual components and assemblies.

Please to the latest edition of the relevant parts list to check the part numbers of any replacement parts.

As a result of the machine may have several causes. To help locate the fault, consult the chapters on "Troubleshooting" in this manual and the "STIHL Service Training Syllabus" for self-assessment.

Please to the "Technical Information" bulletins for engineering changes, which have been introduced since publication of this service manual. Technical Information bulletins also supplement the parts list until a printed edition is issued.

The special servicing tools mentioned in the descriptions are listed in the chapter "Special Servicing Tools" of this manual. Use the part numbers to identify the tools in the "STIHL Special Tools" manual. The manual lists all special servicing tools currently available from STIHL.

Symbols are included in the text and pictures for greater clarity. The meanings are as follows:

In the descriptions:

- = Action to be taken as shown in the illustration (see the text)
- = Action to be taken that is not shown in the illustration (see the text)
- = Situation applies from second number
- = Situation applies up to second number

4.1.1-4.2: Reference to another chapter, i.e. chapter 4.21 in this example.

In the illustrations:

► Pointer

► Direction of movement

Service manuals and technical information bulletins are intended exclusively for the use of properly equipped repair shops. They must not be passed to third parties.

Mounting and removing are made considerably easier if the machine is mounted on assembly stand (2) 0000-0000 3-000 with the aid of clamping fixture (1) 0001-0003 3-100.

Mount the clamping fixture to the assembly stand with two washers and two 500 nuts. The powerhead can then be mounted to the best position for the ongoing repair. The clamps both hands free.

Always use original STIHL replacement parts.

They can be identified by the STIHL part number, the STIHL logo and the STIHL parts symbol

This symbol may appear alone on small parts.
