The A to Z of Fantasy Literature Brian Stableford,2009-08-13 Once upon a time all literature was fantasy set in a mythical past when magic existed animals talked and the gods took an active hand in earthly affairs As the mythical past was displaced in Western estimation by the historical past and novelists became increasingly preoccupied with the present fantasy was temporarily marginalized until the late 20th century when it enjoyed a spectacular resurgence in every stratum of the literary marketplace Stableford provides an invaluable guide to this sequence of events and to the current state of the field The chronology tracks the evolution of fantasy from the origins of literature to the 21st century The introduction explains the nature of the impulses creating and shaping fantasy literature the problems of its definition and the reasons for its changing historical fortunes The dictionary includes cross referenced entries on more than 700 authors ranging across the entire historical spectrum while more than 200 other entries describe the fantasy subgenres key images in fantasy literature technical terms used in fantasy criticism and the intimately convoluted relationship between literary fantasies scholarly fantasies and lifestyle fantasies The book concludes with an extensive bibliography that ranges from general textbooks and specialized accounts of the history and scholarship of fantasy literature through bibliographies and accounts of the fantasy literature of different nations to individual author studies and useful websites The Fire Ascending Chris D'Lacey,2012 Guaranteed to be incredible fantastical and the ultimate page turner this final title in The Last Dragon Chronicles brings together the amazing characters and wonderful worlds that Chris D'Lacey has drawn on throughout the series in one stunning finale **The Dragon in Medieval East Christian and Islamic Art** Sara Kuehn,2011-07-12 This book is a pioneering work on a key iconographic motif that of the dragon It examines the perception of this complex multifaceted motif within the overall intellectual and visual universe of the medieval Irano Turkish world Using a broadly comparative approach the author explores the ever shifting semantics of the dragon motif as it emerges in neighbouring Muslim and non Muslim cultures The book will be of particular interest to those concerned with the relationship between the pre Islamic Islamic and Eastern Christian especially Armenian world The study is fully illustrated with 209 b/w and full colour plates many of

previously unpublished material Illustrations include photographs of architectural structures visited by the author as well as a vast collection of artefacts all of which are described and discussed in detail with inscription readings historical data and textual sources
