Student Use of Rankings in National Magazines in the College Decision-making Process Michele Howard McManus, 2002

College rankings are widely depicted as vital tools for making informed decisions about the college selection process. Based on sales volume and the diversity of ratings currently in existence, there is little doubt that rankings are big business and are undeniably here to stay. On the other hand, very little factual information is available about students' actual use of rankings in the college decision-making process. It is clear that rankings such as those published by US News World Report are now part of the landscape in our system of higher education. However, the problem is to establish the extent students use rankings and to determine user characteristics based on demographics and institutional type. The paramount purpose of this research study is to determine the importance of college rankings in national magazines on students' institutional choice. Analysis of data provided by the Cooperative Institutional Research Program (CIRP) provides a greater understanding of the impact of rankings on students' college decision-making process. Specific research questions for this study include:

1. Do students perceive college rankings to be an important factor in selecting their institution of choice?
2. Does the importance attached to rankings vary significantly when response patterns are examined between students attending ranked national universities and those schools that are not ranked?
3. Does the importance attached to rankings vary significantly when response patterns are examined between students attending ranked national liberal arts colleges and those colleges that are not ranked?
4. Does the importance attached to rankings vary significantly when response patterns are examined between students attending public or private national universities?
5. Does the importance attached to college rankings in national magazines vary significantly when response patterns are examined by gender, age, place of residence, distance from permanent home, academic achievement, financial status, or ethnicity?

Utilizing two US News ranking categories, a total of 40 institutions from 13 states in differing geographic regions were selected for this research. Public and private institutions and ranked and unranked schools were included in this analysis. In addition, each of these colleges participated in the CIRP for fall 2000. For this study, there are 14,541 first-time full-time freshmen represented in the sample. Of these students, 8,827 attend national universities, while 5,714 are enrolled in liberal arts colleges. The majority of students included in this study placed some level of importance on college rankings. Ratings in news magazines are of particular importance to first-time full-time freshmen attending ranked private institutions. In addition, students who deem rankings as important are traditionally aged, live on campus, attend a school a significant distance from home, and have a high level of financial status.

Breaking Ranks Colin Diver, 2022-04-12

Some colleges will do anything to improve their national ranking. That can be bad for their students and for higher education. Since U.S. News World Report first published a college ranking in 1983, the rankings industry has become a self-appointed judge declaring winners and losers among America's colleges and universities. In this revealing account, Colin Diver shows how popular rankings have induced college applicants to focus solely on pedigree and prestige while tempting

educators to sacrifice academic integrity for short term competitive advantage By forcing colleges into standardized best college hierarchies he argues rankings have threatened the institutional diversity intellectual rigor and social mobility that is the genius of American higher education As a former university administrator who refused to play the game Diver leads his readers on an engaging journey through the mysteries of college rankings admissions financial aid spending policies and academic practices He explains how most dominant college rankings perpetuate views of higher education as a purely consumer good susceptible to unidimensional measures of brand value and prestige Many rankings he asserts also undermine the moral authority of higher education by encouraging various forms of distorted behavior misrepresentation and outright cheating by ranked institutions The recent Varsity Blues admissions scandal for example happened in part because affluent parents wanted to get their children into elite schools by any means necessary Explaining what is most useful and important in evaluating colleges Diver offers both college applicants and educators a guide to pursuing their highest academic goals freed from the siren song of the best college illusion Ultimately he reveals how to break ranks with a rankings industry that misleads its consumers undermines academic values and perpetuates social inequality

College Rankings Luke Myers, Jonathan Robe, 2009 Today college quality rankings in news magazines and guidebooks are a big business with tangible impacts on the operation of higher education institutions The college rankings published annually by U S News and World Report U S News are so influential that Don Hossler of Indiana University derisively claims that higher education is the victim of management by the magazine How did academic quality rankings of colleges and universities become so powerful in higher education A review of their historical development in the first section of this study may surprise many readers While college professors and administrators alike largely decry rankings today their origin lies in academia itself Begun as esoteric studies by lone professors college rankings development into the most popularly accepted assessment of academic quality was fueled by the very institutions of higher education they now judge While the purpose and design of academic quality rankings has evolved during the century since their creation their history teaches one clear lesson college rankings fill a strong consumer demand for information about institutional quality and as such are here to stay for the foreseeable future Various approaches to college rankings have different benefits and each is subject to legitimate criticism all of which should be seriously considered in light of the powerful effects that a widely distributed ranking can have on institutions of higher education and the students seeking to enter them Sections II and III will explore these aspects of

college rankings respectively In light of the historical lessons revealed in Section I however movements that seek to reform college rankings should be focused on producing better rankings rather than on trying to eliminate or ignore them Section IV will survey multiple new indicators of academic quality that many view as potential improvements over the indicators upon which current college rankings are based Contains 2 figures 6 tables and 116 endnotes **College Rankings Exposed** Paul Boyer,2003 Argues that information about college ranking systems should be made available to students and parents

University Rankings Jung Cheol Shin,Robert K. Toutkoushian,Ulrich Teichler,2011-06-06 This ground breaking and exhaustive analysis of university ranking surveys scrutinizes their theoretical bases methodological issues societal impact and policy implications providing readers with a deep understanding of these controversial comparators The authors propose that university rankings are misused by policymakers and institutional leaders alike They assert that these interested parties overlook the highly problematic internal logic of ranking methodologies even as they obsess over the surveys assessment of their status The result is that institutions suffer from short termism realigning their resources to maximize their relative rankings While rankings are widely used in policy and academic discussions this is the first book to explore the theoretical and methodological issues of ranking itself It is a welcome contribution to an often highly charged debate Far from showing how to manipulate the system this collection of work by key researchers aims to enlighten interested parties **Applying**

College Rankings Reed Karaim,CQ Press,2015 The annual rankings of America s colleges and universities such as those published by U S News World Report have become a significant force in U S higher education The rankings have been increasingly influential in shaping the reputation of colleges and universities and swaying students choices for admission Being rated a top tier school can bring an institution more recognition donations and qualified applicants while a low ranking can discourage good students from applying Some lower ranked schools have tried to game the system to move up in the rankings by changing admissions policies or distorting spending priorities Critics question the validity of the criteria used to create the rankings and argue that colleges seeking a higher score have been too quick to shape their policies in ways that hurt students Supporters counter that the rankings provide consumers useful information in an area with few impartial measures of quality **Orienting the Student in College, with Special Reference to Freshman Week** Jay Carroll

Knodel,1930 *Academic Quality Rankings of American Colleges and Universities* David S. Webster,1986 **Toward Quality Assurance and Excellence in Higher Education** Ahmed Odeh Al Jaber,2022-09-01 Quality Assurance is not a new concept in the education sector in general and higher education in particular though it is becoming increasingly more relevant and important Higher education helps to improve an individual s quality of life by enabling them to inflate their knowledge and expertise to grasp abstract concepts and theories and to raise their awareness of the world and their community and as such the assurance of quality is becoming more pivotal in the whole education process There is no simple definition of the concept of quality in education though numerous models and theories have been devised Toward Quality Assurance and Excellence of Higher Education is a new episode of the Quality Assurance perception in higher education

which identifies the quality culture and orientation from the beginning integrating crucial factors to build a pyramid of higher education excellence The book compares concepts from the main theories of Quality Assurance management and control when they are applied to educational systems in higher education The book also presents a new model of excellence in higher education Excellence is an architecture of building blocks that comes with process performance effectiveness harmony and collaboration which should be incorporated in a quality oriented concept of a sustainable excellence of higher education The model integrates four main facets the Educational System Quality Assurance Managing and Control Strategic Planning and Globalization Also presented are international best practices in quality assurance in higher education from Japan and Finland
