Excessive Pricing and Competition Law Enforcement Yannis Katsoulacos, Frédéric Jenny, 2018-09-12 This volume examines the controversy surrounding the use of competition law to combat excessive pricing. While high or monopolistic pricing is not regarded as an antitrust violation in the US employing abuse of dominance provisions in competition laws to fight excessive pricing has gained popularity in some BRICS jurisdictions and a number of EU member states in recent years. The book begins by discussing the economic arguments for and against the prohibition of excessive or unfair prices by firms with market power. It then presents various country studies focusing on developed countries such as the UK and Israel and on the BRICS countries to highlight various practical challenges involved in recognizing excessive prices as abusive conduct on the part of dominant firms including how to define, measure and identify excessive prices. The contributors also discuss other policy options that can be used to fight excessive prices in order to protect consumer welfare. **The Producers'**

Yasser Iqbal Daulay, Robbi Rahim, 2021-05-11 The Faculty of Economics and Business Bengkulu University UNIB Provinsi Bengkulu Indonesia organized the 3rd Beehive International Social Innovation Conference BISIC 2020 on 3rd-4th Oct 2020 in Bengkulu Indonesia. The number of participants who joined the zoom room was recorded at 450 participants. Participants came from 4 countries namely Indonesia, Malaysia, Philippines, Thailand. BISIC 2020 is implemented with the support of a stable internet network system and a zoom application. In the implementation, there were several technical obstacles encountered by the participants, namely the difficulty of joining the zoom application due to the unstable internet signal. The holding of a virtual conference felt less meaningful due to the lack of interaction between speakers and participants. The BICED 2020 committee 30 papers were presented and discussed. The papers were authored by researchers from Thailand, Malaysia, Philippines, and Indonesian. All papers have been scrutinized by a panel of reviewers who provide critical comments and corrections and thereafter contributed to the improvement of the quality of the papers. **The Iron Age**, 1896 **Recent Advances in Material**,

Prices, Production, and Inventories Over the Automotive Model Year Adam Copeland,2005 This paper studies the within model year pricing and production of new automobiles Using new monthly data on U.S. transaction prices we document that for the typical new vehicle prices typically fall over the model year at a 9.2 percent annual rate Concurrently both sales and inventories are hump shaped To explain these time series we formulate a market equilibrium model for new automobiles in which inventory and pricing decisions are made simultaneously On the demand side we use micro level data to estimate time varying aggregate demand curves for each vehicle On the supply side we solve a dynamic programming model of an automaker that while able to produce only one vintage of a product at a time may accumulate inventories and consequently sell multiple vintages of the same product simultaneously The profit maximizing pricing and production strategies under a build to stock inventory policy imply declining prices and hump shaped sales and inventories of the magnitudes observed in the data Further roughly half of the price decline is driven by inventory control considerations as opposed to decreasing demand Abstract

Economic and Financial Review ,2011

Time Briton Hadden,Henry Robinson Luce,2004-03 Political Price Cycles in Regulated Industries Claudio Paiva,Rodrigo Moita,2006 This paper develops a model of political regulation in which politicians set the regulated price in order to maximize electoral support by signaling to voters a pro consumer behavior Political incentives and welfare

constraints interact in the model yielding an equilibrium in which the real price in a regulated industry may fall in periods immediately preceding an election. The paper also provides empirical support for the theoretical model. Using quarterly data from 32 industrial and developing countries over 1978-2004 we find strong statistical and econometric evidence pointing toward the existence of electoral price cycles in gasoline markets.
