## **Testimony A Philosophical Introduction:**

**Testimony** Joseph Shieber, 2015-07-03 The epistemology of testimony has experienced a growth in interest over the last twenty five years that has been matched by few if any other areas of philosophy Testimony A Philosophical Introduction provides an epistemology of testimony that surveys this rapidly growing research area while incorporating a discussion of relevant empirical work from social and developmental psychology as well as from the interdisciplinary study of knowledge creation in groups The past decade has seen a number of scholarly monographs on the epistemology of testimony but there is a dearth of books that survey the current field This book fills that gap assessing the strengths and weaknesses of all major competing theories All chapters conclude with Suggestions for Further Reading and Discussion Questions **The Oxford Handbook of Social Epistemology** Jennifer Lackey, Aidan McGlynn, 2025 How do we learn from one another on the internet How can we defend ourselves from propaganda and seek the truth How do our race gender and other aspects of our identity imbue how we learn and know things Social epistemology explores timely and urgent questions such as these which is why the field has seen an explosion of interest in recent years Having originated as a subfield social epistemology now permeates the agenda of mainstream epistemology even though it challenges epistemology's traditional focus on the individual The Oxford Handbook of Social Epistemology offers a collection of cutting edge essays on many of the most important issues in this rapidly growing area of philosophy It takes stock of recent developments in the field and reassesses topics that have been thought to fit comfortably within a more traditional approach to epistemology including our capacities to know our own minds to reason and to remember by examining the ways in which they might be significantly impacted by one's social environment Several chapters interrogate the boundaries of what social epistemology is by exploring its application to significant issues outside of philosophy such as psychology sociology and political theory as well as the ways it intersects with ethics the philosophies of language and mind political philosophy feminist philosophy and critical philosophy of race Divided into seven sections this handbook provides a comprehensive coverage of work in this exciting and fertile area of philosophy as it highlights the relevance and importance of social factors to some of the most pressing epistemological questions facing us as agents in the world **The Routledge Handbook of the Philosophy of Evidence** Maria Lasonen-Aarnio, Clayton Littlejohn, 2023-12-19 What one can know depends on one's evidence Good scientific theories are supported by evidence Our experiences provide us with evidence Any sort of inquiry involves the seeking of evidence It is irrational to believe contrary to your evidence For these reasons and more evidence is one of the most fundamental notions in the field of epistemology and is emerging as a crucial topic across academic disciplines The Routledge Handbook of the Philosophy of Evidence is an outstanding reference source to the key topics problems and debates in this exciting subject and is the first major volume of its kind Comprising forty chapters by an international team of contributors the handbook is divided into six clear parts The Nature of Evidence Evidence and Probability The Social Epistemology of Evidence Sources of Evidence Evidence and

Justification Evidence in the Disciplines The Routledge Handbook of the Philosophy of Evidence is essential reading for students and researchers in philosophy of science and epistemology and will also be of interest to those in related disciplines across the humanities and social sciences such as law religion and history [Progress in Theology](#) Gijsbert van den Brink,Rik Peels,Bethany Sollereder,2024-07-10 This book explores the intriguing relationship between theology science and the ideal of progress from a variety of perspectives While seriously discussing the obstacles and pitfalls related to the notion of progress in theology it argues that there are in fact many different kinds of progress in theology It considers how this sheds positive light on what theologians do and suggests that other disciplines in the humanities can equally profit from these ideas The chapters provide tools for making further progress in theology featuring detailed case studies to show how progress in theology works in practice and connecting with the role and place of theology in the University The book rearticulates in multiple ways theology s distinctive voice at the interface of science and religion [The Routledge Handbook of Social Epistemology](#) Miranda Fricker,Peter J. Graham,David Henderson,Nikolaj J.L.L. Pedersen,2019-07-19 Edited by an international team of leading scholars The Routledge Handbook of Social Epistemology is the first major reference work devoted to this growing field The Handbook s 46 chapters all appearing in print here for the first time and written by philosophers and social theorists from around the world are organized into eight main parts Historical Backgrounds The Epistemology of Testimony Disagreement Diversity and Relativism Science and Social Epistemology The Epistemology of Groups Feminist Epistemology The Epistemology of Democracy Further Horizons for Social Epistemology With lists of references after each chapter and a comprehensive index this volume will prove to be the definitive guide to the burgeoning interdisciplinary field of social epistemology [Knowledge Transmission](#) Stephen Wright,2018-09-03 Our knowledge of the world comes from various sources But it is sometimes said that testimony unlike other sources transmits knowledge from one person to another In this book Stephen Wright investigates what the transmission of knowledge involves and the role that it should play in our theorising about testimony as a source of knowledge He argues that the transmission of knowledge should be understood in terms of the more fundamental concept of the transmission of epistemic grounds and that the claim that testimony transmits knowledge is not only defensible in its own right but indispensable to an adequate theory of testimony This makes testimony unlike other epistemic sources [A Critical Introduction to Testimony](#) Axel Gelfert,2014-09-25 A critical survey of the contemporary philosophical debate about the word of others as a source of knowledge pointing to areas of future research [Why It's OK Not to Think for Yourself](#) Jonathan Matheson,2023-09-29 We tend to applaud those who think for themselves the ever curious student for example or the grownup who does their own research Even as we re applauding however we ourselves often don t think for ourselves This book argues that s completely OK In fact it s often best just to take other folks word for it allowing them to do the hard work of gathering and evaluating the relevant evidence In making this argument philosopher Jonathan Matheson shows how expert testimony and the wisdom

of crowds are tested and provides convincing ideas that make it rational to believe something simply because other people believe it Matheson then takes on philosophy's best arguments against his thesis including the idea that non self thinkers are free riding on the work of others Socrates claim that the unexamined life isn't worth living and that outsourcing your intellectual labor makes you vulnerable to errors and manipulation Matheson shows how these claims and others ultimately fail and that when it comes to thinking we often need not be sheepish about being sheep Key Features Discusses the idea of not thinking for yourself in the context of contemporary issues like climate change and vaccinations Engages in numerous contemporary debates in social epistemology Examines what can be valuable about thinking for yourself and argues that these are insufficient to require you to do so Outlines the key practical takeaways from the argument in an epilogue **The Sacred Books of the Jains** Sarat Chandra Ghoshal,1920 Introduction to philosophy. Psychology. Logic. Theology. Philosophy Apostolos Makrakēs,1940 *The Philosopher's Index* ,2008 Vols for 1969 include a section of abstracts
