*History of Air-to-Air Refuelling* Richard M. Tanner, 2006-09-18 This is a unique account of the development and operational use of air to air flight refuelling since its early beginnings in the USA and the UK to the equipment that is in use today The author draws upon his life long career as senior design engineer with the successful British company In Flight Refuelling who were responsible for the development of the hose and drogue technique now preferred by many of the world s air forces The story begins in the early 1920s when the art of air refuelling was part of the Barn Storming record breaking attempts that were popular in the USA It continues into the late thirties when successful experiments were made Amazingly the Royal Air Force were not interested in pursuing this great technical advantage during World War II and it was the USAAF who requested the British invention to experiment with on their B 17s and B 24s The Korean War saw extended use of operational air to air refuelling for the first time and now the tanker fleet is an essential unit in major air forces around the world
