Absolutely **Hands-On Artificial Intelligence for Cybersecurity** Alessandro Parisi,2019-08-02 Build smart cybersecurity systems with the power of machine learning and deep learning to protect your corporate assets Key Features Identify and predict security threats using artificial intelligence Develop intelligent systems that can detect unusual and suspicious patterns and attacks Learn how to test the effectiveness of your AI cybersecurity algorithms and tools Book

Description Today's organizations spend billions of dollars globally on cybersecurity. Artificial intelligence has emerged as a great solution for building smarter and safer security systems that allow you to predict and detect suspicious network activity such as phishing or unauthorized intrusions. This cybersecurity book presents and demonstrates popular and successful AI approaches and models that you can adapt to detect potential attacks and protect your corporate systems. You'll learn about the role of machine learning and neural networks as well as deep learning in cybersecurity and you'll also learn how you can infuse AI capabilities into building smart defensive mechanisms. As you advance you'll be able to apply these strategies across a variety of applications including spam filters, network intrusion detection, botnet detection, and secure authentication. By the end of this book you'll be ready to develop intelligent systems that can detect unusual and suspicious patterns and attacks, thereby developing strong network security defenses using AI. What you will learn: Detect email threats such as spamming and phishing using AI; Categorize APT zero days and polymorphic malware samples; Overcome antivirus limits in threat detection; Predict network intrusions and detect anomalies with machine learning; Verify the strength of biometric authentication procedures with deep learning; Evaluate cybersecurity strategies and learn how you can improve them.

**Who this book is for:** If you're a cybersecurity professional or ethical hacker who wants to build intelligent systems using the power of machine learning and AI, you'll find this book useful. Familiarity with cybersecurity concepts and knowledge of Python programming is essential to get the most out of this book.

**Create Content That Drives Long-Term Sales. Evergreen Authority For Daily Conversions** Ahmed Musa, 2025-05-31 Listen up: content that sizzles for a week then fades is a waste of your time and energy. If you want sales that keep rolling in day after day, you need content that builds authority once and pays off forever. *Create Content That Drives Long-Term Sales* is your step-by-step guide to crafting evergreen content that converts like clockwork. This isn't about viral fluff. It's about creating solid, dependable content that works for you every single day long after you hit publish. Read this. Build your authority once. Keep selling forever. And watch your business grow with every word you create.

**Intelligence-Based Cardiology and Cardiac Surgery** Anthony C. Chang, Alfonso Limon, Robert Brisk, Francisco Lopez-Jimenez, Louise Y Sun, 2023-09-06 *Intelligence-Based Cardiology and Cardiac Surgery* Artificial Intelligence and Human Cognition in Cardiovascular Medicine provides a comprehensive survey of artificial intelligence concepts and methodologies with real life applications in cardiovascular medicine. Authored by a senior physician data scientist, the book presents an intellectual and academic interface between the medical and data science domains. The book's content consists of basic concepts of artificial intelligence and human cognition applications in cardiology and cardiac surgery. This portfolio ranges from big data, machine and deep learning, cognitive computing, and natural language processing in cardiac disease states such as heart failure.

hypertension and pediatric heart care. The book narrows the knowledge and expertise chasm between the data scientists cardiologists and cardiac surgeons inspiring clinicians to embrace artificial intelligence methodologies. Educates data scientists about the medical ecosystem and create a transformational paradigm for healthcare and medicine. Covers a wide range of relevant topics from real world data large language models and supervised machine learning to deep reinforcement and federated learning. Presents artificial intelligence concepts and their applications in many areas in an easy to understand format accessible to clinicians and data scientists. Discusses using artificial intelligence and related technologies with cardiology and cardiac surgery in a myriad of venues and situations. Delineates the necessary elements for successfully implementing artificial intelligence in cardiovascular medicine for improved patient outcomes. Presents the regulatory, ethical, legal and financial issues embedded in artificial intelligence applications in cardiology.

#### Transforming Special Education

Through Artificial Intelligence Walters, Annette G., 2024-10-25. Special education encounters distinct challenges in delivering personalized and practical assistance to students with disabilities. Educators frequently require support to address the varied needs of these students resulting in learning and development gaps. Moreover, early identification and catering to these needs can take time and effort, affecting students' long term academic success. There is an urgent need for innovative solutions that can bridge these gaps and improve the educational experiences of students with disabilities. **Transforming Special Education Through Artificial Intelligence** offers a comprehensive exploration of how Artificial Intelligence (AI) can transform special education by providing personalized and individualized support for students with disabilities. Through case studies and real life examples, we demonstrate how AI can analyze data to tailor learning experiences and most importantly identify learning difficulties early. This crucial aspect of AI can significantly enhance communication among stakeholders and reassure them about the potential of AI in improving educational outcomes for students with disabilities.

#### **Advances in the Internet of**

**Things** Qusay Hassan, 2025-07-17. Many reports estimated that in 2024 the number of Internet of Things (IoT) devices exceeded 18 billion worldwide with predictions suggesting that it could reach nearly 40 billion by 2033. Despite primarily being consumer devices, a growing number of them will find use in industrial and enterprise applications. This shows the significance of IoT and how it shapes the future. However, to realize its full potential we must address its emerging challenges and highlight recent applications, advances and trends which is the focus of this book. Security and privacy represent some of the key challenges IoT adopters face. The severity of these issues is exacerbated by the growing number of IoT devices, the expansion of Industry 4.0 and the emergence of Industry 5.0 and the significant increase in cybersecurity attacks.

Considering that ensuring security and privacy is crucial for the successful adoption of IoT, this book dedicates several chapters to these areas. This book also introduces some novel models that improve IoT environments and presents several practical implementations that utilize IoT to demonstrate some of its real world applications. Furthermore, it examines several emerging technologies that enable the realization of advanced IoT environments. We see most IoT advances in three main

areas the integration of artificial intelligence machine learning network technologies and hardware design Therefore this book dedicates several chapters to these areas Most chapters touch on artificial intelligence machine learning emphasizing the significance of these technologies in today s and next eneration applications The main objective of this book is to capture the state of the art in IoT and explore some of its emerging challenges solutions and technologies This peer eviewed book serves as a reference for researchers academics practitioners and graduate evel students **PC AI.** ,2001 *Innovative Applications of Artificial Intelligence* 4 Philip Klahr,A.
