Sustaining Mobile Learning

Wan Ng,Therese M. Cumming,2015-07-16 Mobile technologies are one of the fastest growing areas of technology in education For learners they offer an appealing opportunity to transcend teacher defined knowledge and approaches by being able to access multiple alternative sources of information anytime and anywhere While the pace of engagement with and research into the educational applications of mobile technologies has picked up dramatically in the last decade there is no consolidated view of how to sustain the practices or opportunities that are being explored Sustainability is a complex but crucial issue in mobile learning as educational institutions are usually required to make substantial investments in mobile devices and associated technologies time and training to initiate mobile learning programs The complexity of sustainable mobile learning programs is further exacerbated by the fast pace of change of digital technologies where with every change new possibilities are opened up and investments required In addition educators are still attempting to reconcile institutions of formal education with informal mobile learning The book addresses these issues with a particular focus on exploring the challenges surrounding the sustainability of mobile learning in K 12 and higher education investigating the importance of sustaining mobile learning for diverse populations of students globally discussing theoretical models for the sustainability of mobile learning providing the reader with strategies for sustaining mobile learning Presenting new research alongside theoretical models and ideas for practice the book will appeal to researchers academics and postgraduate students in the fields of

education and mobile learning as well as those working in teacher education *A Multidisciplinary Approach to Embodiment* Nancy K Derr, 2020-10-22 This is a collection of pithy and accessible essays on the nature and implications of human embodiment which explore the concept of human being in the most unprecedented manner through seemingly disparate academic disciplines. With contributions from key researchers from around the world this book engages with embodiment through the lens of new materialism. It eschews the view that human beings are debased by materiality and creates a vision of humans as fully embodied creatures situated in a richly populated living planet. The essays in this volume will illustrate and foster new materialist thought in areas including psychology, astrophysics, geology, biology, sociology, philosophy and the performing arts. The book's engaging and enlightening content is made accessible to readers with relatively little background in the various academic disciplines. This is an important and fascinating text which invites readers to explore and expand their understanding and experience of embodiment. It will be particularly useful for postgraduate students and scholars of theoretical and philosophical psychology, philosophy of the mind and social and cultural anthropology. *Statement*, 2012 *Comparing the Ipad to Paper* Kristine E. Although educational technology has been vastly researched one area that is not reflected in the literature is the use of eBooks that are read on mobile digital reading devices and their impact on the performance of literacy skills of lower elementary age students. This quasi experimental nonrandom pretest posttest control group study examined the results of reading an eBook on an Apple iPad and its impact if any on reading comprehension skills of second grade students. This quasi experiment included a treatment group who read eBooks on the Apple iPad for a series of six weeks and the control group who read the same books in traditional print for six weeks. The measurement for both pretest and posttest was the reading comprehension portion of the Curriculum Based Measurement (CBM). The research questions examined were a) What is the difference in the reading comprehension scores of second grade students on the CBM when using eBooks compared to students who use printed text; b) What is the difference in the reading comprehension skills of second grade students who use the multimodal features of the iPad consistently when they read eBooks when compared to students who do not use the multimodal features each time. These data were analyzed using an Analysis of Covariance (ANCOVA). *The Athenaeum*, 1903 **Year Book of the Pennsylvania Society** Pennsylvania Society, New York, 1907 Includes reviews of Pennsylvania books 1902 1903 1905 1915 1917 **Your College Experience, Concise Tenth Edition** John N.
