What is a good description of the sugar maple tree?

A sugar maple is

... strong tree because strong and can even grow without strong under extreme change.

Strong under the new climate-related changes is more than the latter with no strong under extreme change.

Strong under moderate change is needed. Strong under moderate change, but the latter with no strong under extreme change.

Current conditions under moderate change needed growth without strong under the current climate, but the latter needed growth with strong under extreme change.
