*Handbook of Natural Gas Transmission and Processing* Saeid Mokhatab, William A. Poe, John Y. Mak, 2018-10-26 Written by an internationally recognized team of natural gas industry experts the fourth edition of *Handbook of Natural Gas Transmission and Processing* is a unique well researched and comprehensive work on the design and operation aspects of natural gas transmission and processing. Six new chapters have been added to include detailed discussion of the thermodynamic and energy efficiency of relevant processes and recent developments in treating super rich gas, high CO<sub>2</sub> content gas and high nitrogen content gas with other contaminants. The new material describes technologies for processing today's unconventional gases providing a fresh approach in solving today's gas processing challenges including greenhouse gas emissions. The updated edition is an excellent platform for gas processors and educators to understand the basic principles and innovative designs necessary to meet today's environmental and sustainability requirement while delivering acceptable project economics. Covers all technical and operational aspects of natural gas transmission and processing. Provides pivotal updates on the latest technologies, applications and solutions. Helps to understand today's natural gas resources and the best gas processing technologies. Offers design optimization and advice on the design and operation of gas plants.

**Integrated Operations in the Oil and Gas Industry: Sustainability and Capability Development** Rosendahl, Tom, 2012-08-31 The predicted ICT revolution has gained increasing attention in the oil industry the last few years. It is enabled by the use of ubiquitous real time data, collaborative techniques and multiple expertises across disciplines, organizations and geographical locations. *Integrated Operations in the Oil and Gas Industry: Sustainability and Capability Development* covers the capability approach to integrated operations that documents research and development in the oil industry. By capability we refer to the combined capacity and ability to plan and execute in accordance with business objectives through a designed combination of human skills, work processes, organizational change and technology. This book will serve as a knowledge base for those who are interested in learning about and those involved in *Integrated Operations in the Oil and Gas Industry*.

**Local Content Policies in the Oil and Gas Sector** Silvana Tordo, Michael Warner, Osmel Manzano, Yahya Anouti, 2013-07-22 A number of countries have recently discovered and are developing oil and gas reserves. Policy makers in such countries are anxious to obtain the greatest benefits for their economies from the extraction of these exhaustible resources by designing appropriate policies to achieve desired goals. One important theme of such policies is the so called local content created by the sector the extent to which the output of the extractive industry sector generates further benefits to the economy beyond the direct contribution of its value added through its links to other sectors. While local content policies have the potential to stimulate broad based economic development their application in petroleum rich countries has achieved mixed results. This paper

describes the policies and practices meant to foster the development of economic linkages from the petroleum sector as adopted by a number of petroleum producing countries both in and outside the Organisation for Economic Co operation and Development Examples of policy objectives implementation tools and reporting metrics are provided to derive lessons of wider applicability The paper presents various conclusions for policy makers about the design of local content policies
