THE SABER-TOOTH CURRICULUM J. ABNER PEDDIWELL, 1939 New Literacies and Teacher Learning Michele Knobel, Judy Kalman, 2016-03-30 New Literacies and Teacher Learning examines the complexities of teacher professional development today in relation to new literacies and digital technologies set within the wider context of strong demands for teachers to be innovative and to improve students learning outcomes Contributors hail from Argentina Australia Canada Finland Mexico Norway and the U S and work in a broad range of situations grade levels activities scales and even national contexts Projects include early year education through to adult literacy education and university contexts describing a range of approaches to taking up new literacies and digital technologies within diverse learning practices While the authors present detailed descriptions of using various digital resources like movie editing software wikis video conferencing Twitter and YouTube they all agree that digital stuff while important is not the central concern Instead what they foreground in their discussions are theory informed pedagogical orientations collaborative learning theories the complexities of teachers workplaces and young people's interests Thus a key premise in this collection

is that teaching and learning are about deep engagement representing meanings in a range of ways. These include acknowledging relationships and knowledge thinking critically about events, phenomena and processes and participating in valued social and cultural activities. The book shows how this kind of learning doesn't simply occur in a one off session but takes time, commitment and multiple opportunities to interact with others to explore, play, make mistakes and get it right.

And the Rest is Just Algebra Sepideh Stewart, 2016-10-20. This book addresses college students' weak foundation in algebra, its causes and potential solutions to improve their long term success and understanding in mathematics as a whole. The authors, who are experts in a wide variety of fields, emphasize that these difficulties are more complex than just forgotten rules and offer strategic approaches from a number of angles that will increase the chances of student understanding. Instructors who are frustrated with their students' lack of skills and knowledge at college level will find this volume helpful as the authors confront the deeper reasons why students have difficulties with Algebra and reveal how to remedy the issue.

Medical Humanities, Sociology and the Suffering Self Wendy Lowe, 2020-12-22. Following criticisms of the traditionally polarized view of understanding suffering through either medicine or social justice, Lowe makes a compelling argument for how the medical humanities can help to go beyond the traditional biographical and epistemic breaks to see into the nature and properties of suffering and what is at stake. Lowe demonstrates through analysis of major healthcare workforce issues and incidence of burnout how key policies and practices influence healthcare education and experiences of both patients and health professionals. By including first person narratives from health professionals as a tool and resource, she illustrates how dominant ideas about the self enter practice as a refusal of suffering. Demonstrating the relationship between personal experience theory and research, Lowe argues for a pedagogy of suffering that shows how the moral anguish implicit in suffering is an ethical response of the emergent self. This is an important read for all those interested in medical humanities, health professional education, person centred care and the sociology of health and illness.

Leaders in Social Education Christine Woyshner, 2014-09-23. Research in social education over the last forty years has broken new ground in such areas as historical understanding, civic education, cultural studies and curriculum and assessment. This collection is comprised of reflections on the professional trajectories of nineteen leading social studies scholars. Demonstrating that their professional interests have emerged from their autobiographies, the scholars write about their personal influences, professional choices and contributions. The book reveals how social justice, difference and diversity and a commitment to the ongoing project of democracy have been central to their work. The chapters in this volume reveal leading social educators' determined sense of urgency about making the world a better place through their leadership in the field. Each essay provides students, practitioners and researchers alike with background on the nineteen scholars. Also, the scholars provide lists of their favorite publications as well as the works of other scholars that influenced them. Taken together, the chapters in this volume offer thoughts on the past, present and future of social studies.

Teaching Young Learners in a Superdiverse World Heather

Lotherington,Cheryl Paige,2017-04-07 This book documents a collaborative action research project in one school where researchers and practitioners worked together to develop multimodal literacies and pedagogies for diverse multilingual elementary classrooms Following chronologically from Lotherington s Pedagogy of Multiliteracies 2011 this volume picks up after teachers and researchers have learned how to work efficiently as a learning community to offer project based learning approaches This edited collection relates how teachers and students of different grade levels language backgrounds and abilities developed a shared agenda and created a framework for effective and inclusive practices Contributors demonstrate that collaboration creative pedagogical solutions and innovative project based learning are all essential parts of learning and teaching socially appropriate and responsive literacies in a multimodal superdiverse world Curriculum Planning Forrest W.
