Think Simon Blackburn, 1999-08-05 What am I? What is consciousness? What is the difference between past and future? Does the world presuppose a creator? Do we always act out of self-interest? This is a book about the big questions in life: knowledge, consciousness, fate, God, truth, goodness, justice. It is for anyone who believes there are big questions out there but does not know how to approach them. Written by the author of the bestselling *Oxford Dictionary of Philosophy*, *Think* sets out to explain what they are and why they are important. Simon Blackburn begins by putting forward a convincing case for the study of philosophy and goes on to give the reader a sense of how the great historical figures such as Plato, Hume, Kant, and Descartes have approached its central themes. Each chapter explains a major issue and gives the reader a self-contained guide through the problems that philosophers have studied. The large range of topics covered ranges from scepticism, the self, mind and body, and freedom to ethics and the arguments surrounding the existence of God. Written in a lively and approachable manner, this book is ideal for all those who want to learn how the basic techniques of thinking shape our existence.

The Voyage of Discovery William F. Lawhead, 2002 Highly praised by reviewers for its clarity and rich exposition, this history of philosophy text illustrates philosophy as a process and not just a collection of opinions or conclusions. Lawhead helps students retrace the philosopher's intellectual journey rather than simply giving a report of the results so that the students see how the problems arose. Thus the philosopher's problem becomes a puzzle which the student has to face. Lawhead uses metaphors, analogies, vivid images, concrete examples, common experiences, and diagrams to bring the abstract issues down to earth and show the practical implications and contemporary relevance of positions.

Philosophy of Mind John Heil, 2004 This comprehensive textbook, written by a leading author in the field, provides a survey of mainstream conceptions of the nature of mind accessible to readers with little or no background in philosophy.
