**Valences of Historiography** Gevork Hartoonian, 2024-12-30 The compiled essays offer various themes and ways of approaching historiography Each chapter probes the state of contemporary theorization of architecture histories working toward the theme of critically re writing history Essential to each author s contribution are specific traditions created by the mole of history burrowing through the past This book concerns the historian s conjectures towards capturing the past and present zeitgeist Temporality is the theme running through the narrative of this volume It raises the question of whether the ever growing body of work on architectural history should be considered as history More specifically what is the intersection between history and architectural history Furthermore can every text focused on architecture s past be considered categorically historiographic In what capacity does architectural history index history beyond contingencies and without reducing the text to empirical realities and the historian s interest in a specific subject including those collected through archival research itself an emblem of textuality This book upholds the conviction that the past should be recalled accurately and that there is no history but historical criticism the scope of which exceeds the historicity of Humanism Dialectically the timeline experienced across contemporary techno economic and cultural domains aesthetics offers an opportunity to explore architecture produced outside the Euro American continents Valences of Historiography offers a fresh take on architectural history that is useful for academics researchers and architecture students

**The Theoretic Life - A Classical Ideal and its Modern Fate** Alexander S. Rosenthal-Pubul, 2019-01-01 In this work Alexander Rosenthal Pubul presents a broad examination of the ancient philosophical question What is the good life while addressing how the liberal arts can help us to answer this question Greek philosophy distinguished between the noble what is good in itself from the merely useful good for something else From thence follows the distinction between the liberal arts which pursue such noble goods and the mechanical arts which are only instrumental For Aristotle the most noble and excellent good is wisdom itself Hence the theoretic life devoted to the love of wisdom for its own sake philosophy is the highest and the most excellent This work theorizes the origins of modernity in a rebellion against this Greek conception resulting in a complete inversion of the classical hierarchy Sir Francis Bacon

reconceiving the purpose of knowledge as power enthroned technology over philosophy and the liberal arts. The unfolding of the modern Baconian revolution progressively sidelines the liberal arts as practical economic and technical utility become the standard of value. In assessing this problem the book engages in a capacious journey across disciplines like philosophy, history, art, politics and science. It is also a veritable tour across the Western intellectual tradition including Socrates, Plato, Aristotle, Cicero, Seneca, Thomas Aquinas, Bacon, Descartes, Hume, Kant, Nietzsche, Dewey, Berdyaev, Einstein and Heidegger. It pleads the urgent need to preserve the humanizing cultural ideals of the ancient classics against the modern tyranny of utility and the dangers of a new barbarism.

**English Literature: From the beginning of the age of Henry VIII, by Richard Garnett**

Richard Garnett, 1903 *Ubiquitous Music Ecologies* Victor Lazzarini, Damián Keller, Nuno Otero, Luca Turchet, 2020-11-26

Ubiquitous music is an interdisciplinary area of research that lies at the intersection of music and computer science. Initially evolving from the related concept of ubiquitous computing today ubiquitous music offers a paradigm for understanding how the everyday presence of computers has led to highly diverse music practices. As we move from desktop computers to mobile and internet based multi platform systems new ways to participate in creative musical activities have radically changed the cultural and social landscape of music composition and performance. This volume explores how these new systems interact and how they may transform our musical experiences. Emerging out of the work of the Ubiquitous Music Group an international research network established in 2007 this volume provides a snapshot of the ecologically grounded perspectives on ubiquitous music that share the concept of ecosystem as a central theme. Covering theory, software and hardware design and applications in educational and artistic settings each chapter features in depth descriptions of exploratory and cutting edge creative practices that expand our understanding of music making by means of digital and analogue technologies.
