

BlackBerry® International Roaming Troubleshooting Guide

This troubleshooting guide contains hints and tips on how to use your BlackBerry® smartphone when overseas. Before you leave for your destination, ensure that you have a SIM card and International Roaming activated on your phone. This can be done at any SaskTel Authorized Dealer location.

Connect to a GSM or UMTS network

If your BlackBerry normally connects to a CDMA network and is also capable of international roaming, you need to get an activated SIM card from a SaskTel Authorized Dealer before you travel internationally.

- For information about inserting a SIM card, refer to your BlackBerry User Guide.

How to set the Wireless Networks to use while Roaming

*Not available on the BlackBerry 8830

- On the Home screen, press the **Menu** key
- Select **Options** (wrench symbol)
- Select **Mobile Network**
- Perform one of the following:
 - To connect to CDMA networks only, set the **Network Technology** field to **1XEV**
 - To connect to either a GSM or CDMA network, set the **Network Technology** field to **Global**
 - To connect to GSM networks only, set the **Network Technology** field to **GSM/UMTS**. Set the **Network Mode** field (if it is recommended that you set the Network Mode field to **3G & 2G**).
- Press the **Menu** key and click **Save**

How to set your BlackBerry smartphone to GSM mode

BlackBerry 8830

- On the Home screen, press the **Menu** key
- Select **Options** then select **Mobile Network**
- Select **Network Mode** and change to **GSM**
- Press the **Menu** key and click **Save**

BlackBerry 9630 Tour, BlackBerry 9530 Storm & 9530 Storm2

- On the Home screen, press the **Menu** key
- Select **Options** then select **Mobile Network**
- Select the **Network Technology** field and set it to **GSM/UMTS**. Also recommended to set the **Network Mode** field to **3G & 2G**
- Press the **Menu** key and click **Save**

If **No GSM Service** is displayed, try to switch wireless networks manually.

Switch Wireless Networks Manually

- On the Home screen, press the **Menu** key
- Select **Options** then select **Mobile Network**

BlackBerry 8830

- Scroll to **Network Mode**: ensure it is set to **GSM** (vs. **Global**)
- Scroll to **Network Selection Mode** field: change to **Manual** from **Automatic**

BlackBerry 9630 Tour

- Select the **Network Technology** field: change to **Manual** from **Global**
- Select the **Network Mode** field: ensure it is set to **3G & 2G**

BlackBerry 9530 Storm & 9530 Storm2

- Select the **Network Technology** field: ensure it is set to **GSM/UMTS**
- Select **Network Selection Mode**: change to **Manual**
- Click **Scan for Networks**

Your BlackBerry will display "Please wait...Scanning for available networks". When complete, scroll down to all available networks that are partners with Vodafone (SaskTel's European partner).

Select the network at the top of the list, as it is the preferred roaming partner and will be your most reliable option. Your BlackBerry will display "Please wait...Selecting to desired network". If successful, "Network selection succeeded" displays. You now should have Voice and/or SMS service, but perhaps not Data services (BlackBerryInstant Messages, etc.).

If you select a network but still have "Searching for GSM" displayed, try to select the next available network. If you don't see any networks in the list, you are possibly in an area with no coverage.

If your BlackBerry will not operate in **Global Mode**, but will operate in **GSM – Manual mode**, you can leave it set this way. However, there is a risk that you will lose service when you move to a different location and will have to repeat the Manual Network Selection Mode process.

How to tell if you're roaming in GSM coverage

- A GSM network ID will be displayed in the middle of the upper banner part of the screen (eg. F-SFR, F-Bouygues Telecom, etc.). A small triangle (roaming indicator) precedes GSM network ID when traveling outside Netherlands (Vodafone, SaskTel's roaming partner, doesn't show roaming when on their network).
- **GSM** must be displayed in UPPERCASE in the upper right corner to have Voice and SMS/text services
- **GPRS** must be displayed in UPPERCASE in the upper right corner in order to have Data services

Mobile Network connection indicators

 Your BlackBerry is connected to a wireless network.

 Your connection to the wireless network is turned on, but your BlackBerry is not connected to the network or you are in a wireless coverage area in which you can only call emergency numbers.

 Your connection to the wireless network is turned off.

Wireless coverage indicators

Indicators on the Home screen display the wireless coverage level for the area in which you are using your BlackBerry smartphone.
