Trusting Judgements Mark A. Burgman, 2016 Even experienced experts can be biased and overconfident This book explains how to ensure experts provide reliable scientific advice *Expert Judgement in Risk and Decision Analysis* Anca M. Hanea, Gabriela F. Nane, Tim Bedford, Simon French, 2021-02-19 This book pulls together many perspectives on the theory methods and practice of drawing judgments from panels of experts in assessing risks and making decisions in complex circumstances The book is divided into four parts Structured Expert Judgment SEJ current research fronts the contributions of Roger Cooke and the Classical Model he developed process procedures and education and applications After an Introduction by the Editors the first part presents chapters on expert elicitation of parameters of multinomial models the advantages of using performance weighting by advancing the random expert hypothesis expert elicitation for specific graphical models modelling dependencies between experts assessments within a Bayesian framework preventive maintenance optimization in a Bayesian framework eliciting life time distributions to parametrize a Dirichlet process and on an adversarial risk analysis approach for structured expert judgment studies The second part includes Roger Cooke's oration from 1995 on taking up his chair at Delft University of Technology one of the editors reflections on the early decade of the Classical Model development and use a current overview of the theory of the Classical Model providing a deep and comprehensive perspective on its foundations and its application and an interview with Roger Cooke The third part starts with an interview with Professor Dame Anne Glover who served as the Chief Scientific Advisor to the President of the European Commission It then presents chapters on the characteristics of good elicitations by reviewing those advocated and applied the design and development of a training course for SEJ and on specific experiences with SEJ protocols with the intention of presenting the challenges and insights collected during these journeys Finally the fourth and largest part begins with some reflections from Willy Aspinall on his many experiences in applying the Classical Model in several application domains it continues with related reflections on imperfect elicitations and then it presents chapters with applications on medicines policy and management supply chain cyber risk management geo political risks terrorism and the risks facing businesses looking to internationalise

**The Science and Management of Uncertainty** Bruce G. Marcot, 2020-11-26 Uncertainty can take many forms can be represented in many ways and can have important implications in decision making and policy development This book provides a rigorous scientific framework for dealing with uncertainty in real world situations and provides a comprehensive study of concepts measurements and applications of uncertainty in ecological modeling and natural resource management The focus of this book is on the kinds and implications of uncertainty in environmental modeling and management with practical guidelines and examples for successful modeling and risk analysis in the face of uncertain conditions and incomplete information Provided is a clear classification of uncertainty methods for measuring modeling and communicating uncertainty practical guidelines for capturing and representing expert knowledge

and judgment explanations of the role of uncertainty in decision making a guideline to avoiding logical fallacies when dealing with uncertainty and several example cases of real world ecological modeling and risk analysis to illustrate the concepts and approaches Case topics provide examples of structured decision making statistical modeling and related topics A summary provides practical next steps that the reader can take in analyzing and interpreting uncertainty in real world situations Also provided is a glossary and a suite of references    **Elicitation** Luis C. Dias,Alec Morton,John Quigley,2017-11-16 This book is about elicitation the facilitation of the quantitative expression of subjective judgement about matters of fact interacting with subject experts or about matters of value interacting with decision makers or stakeholders It offers an integrated presentation of procedures and processes that allow analysts and experts to think clearly about numbers particularly the inputs for decision support systems and models This presentation encompasses research originating in the communities of structured probability elicitation calibration and multi criteria decision analysis often unaware of each other s developments Chapters 2 through 9 focus on processes to elicit uncertainty from experts including the Classical Method for aggregating judgements from multiple experts concerning probability distributions the issue of validation in the Classical Method the Sheffield elicitation framework the IDEA protocol approaches following the Bayesian perspective the main elements of structured expert processes for dependence elicitation and how mathematical methods can incorporate correlations between experts Chapters 10 through 14 focus on processes to elicit preferences from stakeholders or decision makers including two chapters on problems under uncertainty utility functions and three chapters that address elicitation of preferences independently of or in absence of any uncertainty elicitation value functions and ELECTRE Two chapters then focus on cross cutting issues for elicitation of uncertainties and elicitation of preferences biases and selection of experts Finally the last group of chapters illustrates how some of the presented approaches are applied in practice including a food security case in the UK expert elicitation in health care decision making an expert judgement based method to elicit nuclear threat risks in US ports risk assessment in a pulp and paper manufacturer in the Nordic countries and elicitation of preferences for crop planning in a Greek region    **The Handbook of Rationality** Markus Knauff,Wolfgang Spohn,2021-12-14 The first reference on rationality that integrates accounts from psychology and philosophy covering descriptive and normative theories from both disciplines Both analytic philosophy and cognitive psychology have made dramatic advances in understanding rationality but there has been little interaction between the disciplines This volume offers the first integrated overview of the state of the art in the psychology and philosophy of rationality Written by leading experts from both disciplines The Handbook of Rationality covers the main normative and descriptive theories of rationality how people ought to think how they actually think and why we often deviate from what we can call rational It also offers insights from other fields such as artificial intelligence economics the social sciences and cognitive neuroscience The Handbook proposes a novel classification system for researchers in human rationality and it creates new connections between rationality research in philosophy

psychology and other disciplines Following the basic distinction between theoretical and practical rationality the book first considers the theoretical side including normative and descriptive theories of logical probabilistic causal and defeasible reasoning It then turns to the practical side discussing topics such as decision making bounded rationality game theory deontic and legal reasoning and the relation between rationality and morality Finally it covers topics that arise in both theoretical and practical rationality including visual and spatial thinking scientific rationality how children learn to reason rationally and the connection between intelligence and rationality

Marcot, 2019-09-10 An authoritative guide to quantitative methods that will help wildlife scientists improve analysis and decision making Over the past fifty years wildlife science has become increasingly quantitative But to wildlife scientists many of whom have not been formally trained as biometrists computer modelers or mathematicians the wide array of available techniques for analyzing wildlife populations and habitats can be overwhelming This practical book aims to help students and professionals alike understand how to use quantitative methods to inform their work in the field Covering the most widely used contemporary approaches to the analysis of wildlife populations and habitats Quantitative Analyses in Wildlife Science is divided into five broad areas general statistical methods demographic estimation dynamic process modeling analysis of spatially based data on animals and resources numerical methods Addressing a variety of topics from population estimation and growth trend predictions to the study of migration patterns this book presents fresh data on such pressing issues as sustainable take control of invasives and species reintroduction Authored by leading researchers in wildlife science each chapter considers the structure of data in relation to a particular analytical technique as well as the structure of variation in those data Providing conceptual and quantitative overviews of modern analytical methods the techniques covered in this book also apply to conservation research and wildlife policy Whether a quick refresher or a comprehensive introduction is called for Quantitative Analyses in Wildlife Science is an indispensable addition to every wildlife professional's bookshelf Contributors William M Block Leonard A Brennan Stephen T Buckland Christopher C Chizinski Evan C Cooch Raymond J Davis Stephen J DeMaso Randy W DeYoung Jane Elith Joseph J Fontane Julie A Heinrichs Mevin B Hooten Julianna M A Jenkins Zachary S Laden Damon B Lesmeister Daniel Linden Jeffrey J Lusk Bruce G Marcot David L Miller Michael L Morrison Eric Rexstad Jamie S Sanderlin Joseph P Sands Erica F Stuber Chris Sutherland Andrew N Tri David B Wester Gary C White Christopher K Williams Damon L Williford

**Big Picture Bioethics: Developing Democratic Policy in Contested Domains** Susan Dodds, Rachel A. Ankeny, 2016-07-27 This book addresses the problem of how to make democratically legitimate public policy on issues of contentious bioethical debate It focuses on ethical contests about research and their legitimate resolution while addressing questions of political legitimacy How should states make public policy on issues where there is ethical disagreement not only about appropriate outcomes but even what values are at stake What constitutes justified democratic policy in such conflicted domains Case studies from Canada and Australia

demonstrate that two countries sharing historical and institutional characteristics can reach different policy responses This book is of interest to policymakers bioethicists and philosophers and will deepen our understanding of the interactions between large scale socio political forces and detailed policy problems in bioethics asdf *Organising and Managing Work* Tony J. Watson,2001 The author of Management Organisation and Employment Strategy presents a text on organising and managing work It covers human resource management business objectives and strategy *The Journal of Leadership Studies*,1995

**Torture and the Military Profession** Jessica Wolfendale,2007-10-04 The military claims to be an honourable profession yet military torture is widespread Why is the military violating its own values Jessica Wolfendale argues that the prevalence of military torture is linked to military training methods that cultivate the psychological dispositions connected to crimes of obedience While these methods are used the military has no credible claim to professional status Combating torture requires that we radically rethink the nature of the military profession and military training
