California. State Board of Equalization,2014 Evaluation of Potential Use Cases for Blockchain in the Insurance Industry
Ricardo Escoda,2021-03-09 Master s Thesis from the year 2020 in the subject Economics Finance grade 1 3 International
School of Management Campus Munich language English abstract Blockchain is considered to be a breakthrough technology
with many strengths and opportunities but also weaknesses and threats for all industries around the globe It has the
potential to revolutionize many sectors but it is not a universal remedy and does not replace every single traditional
technology Most businesses do feel insecure whether to invest time and money for Research and Development due to the
lack of industry standards and regulations with respect to the technology Before being able to guarantee suitability and
successful implementation in any business it is essential to study the differences between public private hybrid and
consortium Blockchain types In areas of application not strongly relying on Blockchain s distributed systems alternative
solutions such as Big Data Analytics Artificial Intelligence and Machine Learning might be more valuable Nonetheless
Blockchain promises the unique potential for insurance companies to efficiently serve global markets with areas of
application mainly concentrating on parts of the VC where bureaucracy can be reduced by automation For instance the use
of Smart Contracts where lots of data are analyzed saved distributed and pro cessed By implementing BC fields where the
focus is on customer experience such as Payments Data Security Transparency and Developing New Business and Product
Ideas can be improved enormously Use cases and new products supported by Blockchain might include P2P Micro
Insurances Ad hoc and Parametric Insurance Models Automized Underwriting Reduction of Fraud and Abuse and Health
Insurance Processes Real Time Analytics in the Form of SCs Instant Pay Outs Automized Claims Management and Improved
Risk Modelling of Insurance Businesses might be achievable by connecting Blockchain and Big Data Contrary to the
expectations of the author most industry experts are aware of the benefits and opportunities the technology can bring to
their companies Still Blockchain is not anchored in their medium to long term visions and strategies Most of the interviewees
would rather act as active observers and early followers than taking the lead proactively Reasons for this behavior are the
lack of market standards and regulations the absence of solid Blockchain networks and the shortage of use cases but also the
lack of know how and data security concerns **Small Business Sourcebook** ,2010 Securing the Clicks Network
