

A futuristic, high-tech background with a dark blue and black color scheme. The scene is filled with glowing blue lines, circles, and abstract shapes that suggest a complex digital or artificial intelligence environment. In the center, the text "AI OVERVIEW" is prominently displayed in a large, white, sans-serif font. The "AI" is significantly larger than the word "OVERVIEW" below it. The overall aesthetic is sleek and modern, evoking a sense of advanced technology and data processing.

Intellectual Property Law and Access to Medicines Srividhya Ragavan, Amaka Vanni, 2021-07-28 The history of patent harmonization is a story of dynamic actors whose interactions with established structures shaped the patent regime. From the inception of the trade regime to include intellectual property IP rights to the present, this book documents the role of different sets of actors: states, transnational business corporations or civil society groups, and their influence on the structures such as national and international agreements, organizations, and private entities that have caused changes to healthcare and access to medication. Presenting the debates over patents, trade, and the Agreement on Trade-Related Aspects of Intellectual Property Rights (TRIPS) Agreement as it galvanized non-state and non-business actors, the book highlights how an alternative framing and understanding of pharmaceutical patent rights emerged as a public issue instead of a trade or IP issue. The book thus offers an important analysis of the legal and political dynamics through which the contest for access to lifesaving medication has been and will continue to be fought. In addition to academics working in the areas of international law, development, and public health, this book will also be of interest to policy makers, state actors, and others with relevant concerns working in nongovernmental and international organizations.
