

The background of the entire image is a deep space scene. In the center, there is a large, glowing galaxy cluster or nebula with intricate, swirling patterns of light in shades of blue, purple, and white. This central feature is surrounded by a vast field of distant stars. A large, dark, circular shape, resembling a planet or a lens, frames the central galaxy cluster. The title text is overlaid on the upper portion of this dark circle.

Conquering Resources: The Growth and Decline of the PLA's Science and Technology Commission for National Defense Benjamin C. Ostrov, Richard P. Suttmeier, 2019-07-26 This case study seeks to explain how organizations grow and the limits to that growth when an organization engaged in policy implementation lacks the resources necessary to achieve policy goals The discussion of the basis of conflict that emerges from this study is of lasting significance For years studies of this issue have pointed to various models of factionalism stressing the informal character of the groups involved In Professor Ostrov's study however conflict is shown to have a supra Cultural Revolutionary institutional basis in this and other key units *Numerical Methods for Scientific Computing* Kyle Novak, 2022-03-13 A comprehensive guide to the theory intuition and application of numerical methods in linear algebra analysis and differential equations With extensive commentary and code for three essential scientific computing languages Julia Python and Matlab **Quantum International Relations** James Der Derian, Alexander Wendt, 2022 The contributors to this volume are motivated by a common apprehension and a common hope The apprehension was first voiced by Einstein who lamented the inability of humanity at the individual and social level to keep up with the increased speed of technological change brought about by the quantum revolution As quantum science and technology fast forward into the 21st century the social sciences remain stuck in classical 19th century ways of thinking Can such a mechanistic model of the mind and society possibly help us manage the fully realized technological potential of the quantum That's where the hope appears that perhaps quantum is not just a physical science but a human science too In *Quantum International Relations* James Der Derian and Alexander Wendt gather rising scholars and leading experts to make the case for quantum approaches to world politics As a fundamental theory of reality and enabler of new technologies quantum now touches everything with the potential to revolutionize how we conduct diplomacy wage war and make wealth Contributors present the core principles of quantum mechanics entanglement uncertainty superposition and the wave function as significant catalysts and superior heuristics for an accelerating quantum future Facing a reality which no longer corresponds to an outdated Newtonian worldview of states as billiard balls individuals as rational actors or power as objective interest Der Derian and Wendt issue an urgent call for a new human science of quantum International Relations At the centenary of the first quantum thought experiment in the 1920s this book offers a diversity of explorations speculations and approaches for understanding geopolitics in the 21st century **Inside the Atheist Mind** Anthony DeStefano, 2018-03-20 There is only one way to deal with bullies even in this politically correct world and that is to crush them USA Today bestselling author Anthony DeStefano is tired of playing nice After years of responding

patiently and agreeably to the pseudo intellectual arguments and tactics of today's militant atheists he's had enough. In this entertaining no holds barred retort to atheism and its proponents DeStefano reveals the intellectual bankruptcy at atheism's core and equips believers to respond to its hollow arguments. A witty and devastating takedown of the new atheist position. Inside the Atheist Mind systematically debunks the theories of Richard Dawkins, Christopher Hitchens, Sam Harris, and others, revealing how inconsistent, illogical, and frankly ludicrous their conclusions truly are. Poking fun at atheists in a clever and intelligent way, DeStefano demonstrates just how full of holes the new atheism is and reveals that it is actually a religion of its own, complete with a creed, a set of commandments and sacraments, and a rigid moral code with rewards and punishments. More than that, DeStefano exposes that atheism is itself a superstition of the worst kind. Using irony and a healthy dose of playful sarcasm, Inside the Atheist Mind lampoons, teases, and deflates the atheist position, unmasking it for what it is: an empty, intellectually barren philosophy devoid of any logic and common sense. *Learned Lives in England, 1900-1950*
