The SAGE Handbook of Qualitative Data Analysis Uwe Flick, Katie Metzler, 2014

The wide range of approaches to data analysis in qualitative research can seem daunting even for experienced researchers. This handbook is the first to provide a state of the art overview of the whole field of QDA from general analytic strategies used in qualitative research to approaches specific to particular types of qualitative data including talk, text, sounds, images and virtual data.

[The Sage Handbook of Qualitative Research Quality](#) Uwe Flick, 2024-12-12

This Sage Handbook presents an interdisciplinary collection of chapters exploring how to assess the quality of collecting and analysing qualitative data while maintaining a focus on diversity, digital and critical approaches. The Handbook considers essential questions such as: what is good qualitative research? What makes qualitative research good research? And how can we make qualitative research better research? Contributions come from a wide array of experts and highlight answers to questions from various disciplinary and geographical areas from mixed methods to multimodal and online research from specific types of data and methods to specific target groups and from theoretical and epistemological contexts to those where funding has an impact on how research is done and assessed.

Qualitative research has evolved in many respects in recent decades and has grown increasingly multidisciplinary. Research in general is facing new challenges around how to take diversity and decolonisation into account in what researchers do as well as how to produce and communicate qualitative research quality. This Handbook offers a timely overview of such developments and will support researchers involved in planning, designing, doing and evaluating qualitative research in developing an increased sensitivity for contemporary debates and challenges in the field.
