Foran, 1954 *The Math Gene* Keith Devlin, 2001-05-17 If people are endowed with a number instinct similar to the language instinct as recent research suggests then why can't everyone do math In *The Math Gene* mathematician and popular writer Keith Devlin attacks both sides of this question Devlin offers a breathtakingly new theory of language development that describes how language evolved in two stages and how its main purpose was not communication Devlin goes on to show that the ability to think mathematically arose out of the same symbol manipulating ability that was so crucial to the very first emergence of true language Why then can't we do math as well as we speak The answer says Devlin is that we can and do we just don't recognize when we're using mathematical reasoning **Thinking in numbers** Hunter
