

### **Daily Progress Notes (The "SOAP" note)**

Progress notes are to be written by the resident or intern on each covered medical patient on a daily basis. The daily progress note serves as a written medical-legal document that:

- Serves as a record of a patient's hospitalization
- Must be completed on a **Daily** basis and includes all "events" that occur during the hospitalization
- Records "events" in terms of subjective and objective findings
- Must include new and active patient health/social issues ("problems")
- Each problem is evaluated/assessed and an appropriate plan is formulated
- Must be legible and well written so to avoid any misunderstanding by the reader
- Must have a time and date and be signed on each page by the author in legible fashion.

The daily progress note is traditionally organized as a "**SOAP**" Note. Many, however, organize the Progress note as "**HSOAP**" where the H stands for history and contains one or two sentences summarizing the patient's case.

#### **S=Subjective**

- Record of subjective findings that occurred during the evening, overnight, and in the morning that patient is being examined.
- Essentially how the patient felt during the evening, night time and morning hours and what happened during those hours.

#### **O=Objective (Includes all the following)**

- Physical Exam: Vital signs, focused physical exam but almost always should include:
  - LUNG
  - CARDIAC
  - ABDOMINAL
  - EXTREMITIES
- Laboratory data
- Diagnostic Imaging
- Microbiology
- Please note that a **Medication List** which includes a listing of all scheduled and PRN (as needed) medications that are relevant to active problems is always helpful and recommended but is not required.

**Psychoeducational Assessment and Report Writing** Stefan C. Dombrowski, 2020-06-10 The second edition of this textbook provides expanded and updated guidance on the process of psychoeducational assessment and report writing for children in grades K-12. It casts the entire process within a newly proposed evidence-based psychoeducational assessment and report writing framework and explains how to convey results through detailed well-written reports. The new edition guides readers step by step through the assessment process, collecting data, writing reports, and communicating conclusions for students with conditions spanning the range of IDEA classifications. Chapters offer a broad understanding of assessment and communication skills as well as the ethical, legal, cultural, and professional considerations that come with psychoeducational evaluation. In addition, chapters significantly expand on the coverage of learning disabilities, autism spectrum, intellectual disabilities, gifted, and other health impaired and emotional disturbance assessment. The text updates sample reports from the previous edition, offering annotated commentary in the report explaining salient points and major decisions, and incorporates additional report samples to demonstrate fully the assessment and report writing process. Key topics addressed in the revised and expanded edition include Psychoeducational assessment and report writing in school and clinic settings, Interview formats from various perspectives including caregivers, parents, teachers, and students, Assessment of culturally and linguistically diverse youth, Assessment of social, emotional, behavioral, and mental health difficulties that may affect students' educational functioning, Common academic difficulties including reading, writing, and mathematics, Common recommendations and accommodations for behavioral, social, emotional, and learning needs, Incorporation of response to intervention curriculum-based assessment data into the psychoeducational report. **Psychoeducational Assessment and Report Writing** 2nd Edition is an essential textbook for graduate students as well as researchers, professors, and professionals in child and school psychology, educational assessment, testing, and evaluation, social work, and related disciplines.

**Official Records**, 1999    **Wastewater Treatment and Reuse, Theory and Design Examples, Volume 1** Syed R. Qasim, Guang Zhu, 2017-11-22 This book will present the theory involved in wastewater treatment processes, define the important design parameters involved, and provide typical values of these parameters for ready reference and also provide numerical applications and step-by-step calculation procedures in solved examples. These examples and solutions will help enhance the readers' comprehension and deeper understanding of the basic concepts and can be applied by plant designers to design various components of the treatment facilities. It will also examine the actual calculation steps in numerical examples, focusing on practical application of theory and principles into process and water treatment facility design.

**Political Authority** Peter Winch, 2025-07-15 Peter Winch (1926-1997) was one of the most important philosophers of his generation. Although best known for his work in social science and the interpretation of Ludwig Wittgenstein, he had a long-standing interest in ethics and political philosophy and was writing a book on political philosophy at the time of his death. This volume

collects together Winch's previously unpublished manuscripts on political philosophy alongside an editorial introduction which outlines the development of his thought over the course of his life. It demonstrates the originality and enduring relevance of Winch's philosophical work to perennial issues concerning the nature and justification of political authority.

*Bolt v. City of Lansing*, 459 MICH 152 (1998), 1998 108511    Chemical Engineering Progress, 1993    **Atlas of Neuroanatomy** Joseph J. Warner, 2001 Contains one of the best collections of neural images to appear in an atlas. Included throughout are high resolution slide images of gross brain and spinal cord anatomy and histologic preparations. Places major emphasis on functional correlations and principles of systems organizations.    **Intelligent Systems and Simulation** Sharadia Dey, Sabyasachi Mondal, Abhijit Paul, Jyoti Sekhar Banerjee, Ahmed J. Obaid, 2025-06-27 This book covers a wide range of topics such as mathematical modeling, computational methods, simulation techniques in engineering and their applications in environmental sciences. It begins with an introduction to the fundamental concepts and principles of mathematical modeling with subsequent sections delving into various simulation techniques including numerical methods, statistical modeling and bio mathematical modeling. It also explores the application of these techniques in addressing complex environmental problems. Features: Covers mathematical and computational modeling techniques for simulation in engineering, mathematical and environmental domains. Explores intelligent techniques and simulation methods to enhance accuracy and efficiency in modeling and simulation. Includes practical applications and studies that demonstrate the effectiveness of techniques in real world scenarios. Incorporates pertinent newly developed methodologies and applications. Discusses CFD software tools like Fortran, MATLAB and Mathematics. This book is aimed at researchers and graduate students in computer engineering, applied mathematics and applied ecology.    **Standard & Poor's Stock Reports**

, 2005-10    **Principles and Practice of Geriatric Psychiatry** Marc E. Agronin, Gabe J. Maletta, 2012-03-28 Many elderly patients suffer from psychiatric conditions that result from or are made worse by existing medical conditions. This new edition integrates clinical expertise needed to evaluate and treat psychiatric, medical and neurologic disorders in the older patient. Both scientific foundations of and clinical approaches to psychiatric disease are discussed by a range of experts who rely on evidence based clinical guidelines and outcomes data. Most chapters include case studies that illuminate the approaches to diagnosis and treatment. The book's five sections include basic principles of evaluation and treatment for specific disorders, appendices offer further insight into pharmacotherapy and neuroanatomic foundation of psychiatric diseases.    *Reeds Eastern Almanac 2026* Perrin Towler, 2025-10-02 The Reeds Eastern Almanac contains essential navigation and pilotage information covering the UK east coast and the Dutch and Belgian coastlines.    **Type-Based Flood**

**Statistics** Svenja Fischer, Andreas H. Schumann, 2023-09-13 This book summarises for the first time all relevant methodologies for type based flood statistics. It introduces the basis of flood typology and makes them accessible to the user. Flood types improve the understanding of the flood generating processes and characterise the flood event in terms of its

features such as peak volume and hydrograph shape In addition they can also significantly expand the information used in flood statistics and add valuable flood characteristics to the determination of design floods especially the determination of flood scenarios relevant for reservoir management A detailed framework with all aspects of point and spatial statistics as well as regionalisation is presented and examples illustrate the benefit of the proposed methodology The target audience is both users in associations and engineering offices as type based statistics are increasingly becoming part of the specifications and researchers as this is a current field of research
